Job Description

Who we are:

For over 20 years, Global Relay has set the standard in enterprise information archiving with industry-leading cloud archiving, surveillance, eDiscovery, and analytics solutions. We securely capture and preserve the communications data of the world's most highly regulated firms, giving them greater visibility and control over their information and ensuring compliance with stringent regulations.

Though we offer competitive compensation and benefits and all the other perks one would expect from an established company, we are not your typical technology company. Global Relay is a career-building company. A place for big ideas. New challenges. Groundbreaking innovation. It's a place where you can genuinely make an impact - and be recognized for it.

We believe great businesses thrive on diversity, inclusion, and the contributions of all employees. To that end, we recruit candidates from different backgrounds and foster a work environment that encourages employees to collaborate and learn from each other, completely free of barriers.

Your Role:

We are looking for a Software Development Co-Op student to join our Engineering Projects team in Halifax, NS. This is an exciting opportunity to gain hands-on development experience with focus on best practices. If you are energetic and want to learn, we would love to have you on our team!

Your Job:

• Work as part of a small team to write Python code for internal tooling
•Write unit tests for your Python code
•Collaborate on system designs with your Sr. Architect and members of the Global Relay Dev Teams
•Help triage issues with other engineering teams

Job Requirements

About You:

- Experience with Python in a course or work environment
- CGPA of B- or higher
- Side projects that demonstrate your skills
- Understanding of current development methodologies
- Experience with any of:
- SonarQube
- Artifactory
- Bitbucket, Confluence & JIRA
- Team player with good communication skills, both oral and written

Citizenship Requirement   N/A
