Job Description	

Geotab ® is a global leader in IoT and connected transportation and certified "Great Place to Work™." We are a company of diverse and talented individuals who work together to help businesses grow and succeed, and increase the safety and sustainability of our communities.

Geotab is advancing security, connecting commercial vehicles to the internet and providing web-based analytics to help customers better manage their fleets. Geotab's open platform and Geotab Marketplace ®, offering hundreds of third-party solution options, allows both small and large businesses to automate operations by integrating vehicle data with their other data assets. Processing billions of data points a day, Geotab leverages data analytics and machine learning to improve productivity, optimize fleets through the reduction of fuel consumption, enhance driver safety and achieve strong compliance to regulatory changes.

Our team is growing and we're looking for people who follow their passion, think differently and want to make an impact. Ours is a fast paced, ever changing environment. Geotabbers accept that challenge and are willing to take on new tasks and activities - ones that may not always be described in the initial job description. Join us for a fulfilling career with opportunities to innovate, great benefits, and our fun and inclusive work culture. Reach your full potential with Geotab. To see what it's like to be a Geotabber,

Who you are:

We are always looking for bright, curious talent eager to learn and contribute. If you are data-driven, inquisitive, and motivated to solve real-world problems, this internship is an exciting opportunity to grow your skills. Join our Product Safety team and gain hands-on experience supporting meaningful, high-impact work.We are always looking for amazing talent who can contribute to our growth and deliver results! Geotab is seeking a data-driven, inquisitive, and motivated Analytics Intern to support our Product Safety team. If you love technology, and are keen to join an industry leader - we would love to hear from you!

What you'll do:

As a Product Safety Analytics Intern, you will be a key member of the Geotab Product Safety & Interoperability Team, In this role, you will analyze trends and derive insights related to vehicle safety and telematics device interoperability and cybersecurity. You'll work on real-world data to help uncover potential safety risks, predict failure modes, and contribute to the improvement of our telematics product's integration with various vehicle platforms.

To be successful in this role, you'll need to be an efficient self-starter with the ability to operate effectively in a fast-paced environment. You're a masterful problem-solver, highly organized, with exceptional communication skills and an excellent ability to build and manage relationships with both internal and external stakeholders.

The opportunity:

• 12 month work-term beginning May 2026.

•Full-time, paid internship: Monday - Friday, 37.5hrs/week.

•Your first week at Geotab begins with 'GEO Launch' - a one-week Employee Orientation. Click here to learn more!

•Learn more about the Geotab Campus Program here.

•This posting is for an existing vacancy.

How you'll make an impact:

• Analyze structured and unstructured data on device performance, vehicle compatibility, and safety events.

•Identify patterns, trends, and issues in product usage, interoperability, and incident reports.

•Create dashboards and visualizations to share insights with cross-functional teams.

•Assist in developing predictive models to identify early indicators of safety issues.

•Conduct cybersecurity research and support experiments related to CAN Bus breach detection.

•Evaluate data anonymization methods for secure data sharing with OEM partners.

•Collaborate with Product and Engineering to define product safety and performance metrics.

•Perform root cause analyses on anomalous device or vehicle behavior.

•Document analytical processes, findings, and supporting methodologies.

Job Requirements

What you'll bring to the role:

• Currently pursuing a Bachelor's or Master's degree in Data Science, Statistics, Engineering, Computer Science, Applied Math, or a related field.

•Familiarity with Python, R, or SQL for data manipulation and analysis.

•Experience with data visualization tools (e.g., Tableau, Power BI, or Matplotlib/Seaborn).

•Knowledge of basic machine learning techniques and statistical analysis methods.

•Excellent problem-solving skills and an analytical mindset with attention to detail.

•Passion or interest in automotive technology, IoT, vehicle safety, or telematics systems is a strong plus.

Preferred Qualifications

• Understanding of CAN bus, OBD-II protocols, or general automotive diagnostic data.

•Experience working with large datasets or streaming data (e.g., from sensors or telematics devices).

•Familiarity with data quality assessment, cleaning, and enrichment techniques.

Citizenship Requirement   N/A
