Job Description	

Student, Digital Applications Development

At Fidelity, we've been helping Canadian investors build better financial futures for over 35 years. We offer individuals and institutions a range of trusted investment portfolios and services - and we're constantly seeking to find new and better ways to help our clients. As a privately owned company, we boldly embrace innovation in all areas as we continue to grow our business into the future.

Working with us means you'll be part of a diverse and dedicated group of people who make a real difference for our clients and communities every day. You'll have a wide range of opportunities to grow and develop your career in an inclusive environment where you'll feel valued and supported to be your best - both personally and professionally.

What we provide:

Fidelity offers you the chance to build a career, develop professionally and explore different career paths throughout the company. Students are placed into an area of interest and will be provided with a mentor to support them throughout their journey. We offer our students an extensive training program to help enhance skills in communication, public speaking, networking, business etiquette and emotional intelligence. Fidelity proudly supports various non-profit organizations and provides students with the opportunity to volunteer to make a difference in their community. You've worked hard to prepare yourself for a great career. No matter what your undergraduate degree is in, there is an opportunity for you at Fidelity.

How you'll make an impact:

As a **student in Digital Applications Development**, you will have the opportunity to:

• Analyze on-line customer behavior and develop classification models

•Participate in developing "proof of concept" responsive web designs

•Assist with the investigation of our next generation Web platform

•Ad hoc programming assignments to support our Digital Applications Development Team.

•Collaborate with business partners to help identify, recommend, and prioritize new application features

•Work with team members in the designing, coding, testing, debugging and implementation of new Web pages and sites and
 Mobile applications, adhering to Fidelity standards and practices

Job Requirements

What we're looking for:

• Working towards a university degree with a concentration in Computer Science or related technical program, ideally in your 3rd or
  4th year of study

•A keen interest and knowledge of Web development

•A desire to work on usability and client experience standards

•Strong understanding of Internet programming languages, including Java, JavaScript, HTML/HTML5 technologies, JavaScript,
 CSS, CSS3 and the jQuery libraries

•Knowledge of Application Servers such as tomcat would be an asset

•Knowledge of Automation and Selenium would be an asset

•A creative aptitude focused on User Experience Design

•You must be available on a full-time basis for the duration of the co-op term

Citizenship Requirement   N/A
