Intern, Mobile Software Engineer - Team Capital One Travel - Fall 2025

About Capital One Canada.

For over 20 years, we've been on a mission to change banking for good and build relationships by making credit accessible, simple, intuitive and rewarding. We want to help Canadians succeed with credit, because we believe in people - in our customers, in our associates, and in talent like you!

About the Team

Join the fast-growing Capital One Travel team, as we seek to transform the way customers book travel. Capital One Travel is a fast-moving, highly innovative, digital-first business within Capital One's Premium Products and Experiences organization. We aim to grow an industry leading travel booking platform that customers love and that delivers unique, differentiated benefits to our millions of customers while also powering the headline marketable benefits of our credit card products. As an iOS Software Engineer in Capital One Travel, you'll have the opportunity to be on the forefront driving a major transformation within Capital One.

At Capital One, the iOS and Android platforms are recognized as an opportunity to reach our customers in unique, personal and engaging ways. Our engineers are provided with top of the line Macbook Pros, high-end monitors, and the necessary tooling to develop the best possible products with the least amount of friction.

About the Role

As an engineer in Capital One Travel, you'll help spearhead the development of mobile features leveraging Swift, Kotlin, and reactive programming to help us build incredible mobile experiences for our customers throughout their travel journey. From shopping and booking their travel to actively helping while in transit, we aim to provide our customers the right information at the right time to make their travel experience as easy as possible. You'll partner with fellow Software Engineers, UX/UI Designers and Product Owners/Analysts to deliver these high performing customer experiences that are engaging, purposeful and powerful in their simplicity.

- **IDE:** XCode, Android Studio, Eclipse
- **Language:** Swift. SwiftUI, Java, Kotlin
- **Monitoring Tool:** NewRelic, Splunk
- **CI/CD:** Jenkins, OnePipeline (Capital One's innersourced CICD pipeline)

Your Responsibilities:

- Work as part of a dynamic team throughout the software development life cycle, from initial designs to delivery
- Develop code to meet acceptance criteria
- Conduct design and code reviews to ensure high-level quality output
- Ensure adherence to continuous improvement practices as required to meet quality, and time-to-market imperatives
- Participate in Agile ceremonies, design and brainstorming sessions
- Collaborate with Product and Analyst stakeholders to implement enhancements or new applications
- Technical documentation for analysis, test results and release
- Learn and build your mobile features on the job
- Have fun!

Application Details:

- **If you are a University of Waterloo candidate, please <u>use your WaterlooWorks email address</u> in your application on WorkDay to ensure your application is not lost**
- Please ensure you attach your work term records, resume, and transcript in the attachment section under Resume/CV when you create your profile to apply on WorkDay

Job Requirements

Basic Qualifications:

- Will obtain a Bachelor's degree or higher from January 2026 or later
- Familiarity with mobile application development
- Good communication, presentation, and writing skills
- Good understanding of testing fundamentals
- Able to work within a team setting and actively participate and collaborate in team discussions

Preferred Qualifications:

- Experience with developing mobile applications
- Experience with reactive programming
- Experience with version control technology i.e. Git
- Experience with Jenkins CI/CD, microservices, API design / integration

Citizenship Requirement   N/A
