Company Overview

At Motorola Solutions, we believe that everything starts with our people. We're a global close-knit community, united by the relentless pursuit to help keep people safer everywhere. Our critical communications, video security and command center technologies support public safety agencies and enterprises alike, enabling the coordination that's critical for safer communities, safer schools, safer hospitals and safer businesses. Connect with a career that matters, and help us build a safer future.

Department Overview

At Motorola Solutions, we create technologies our customers refer to as their lifeline. Our technology platforms in communications, software, video and services help our customers work safely and more efficiently. Whether it is helping firefighters see through smoke, enabling police officers to see around street corners, or reliably keeping the lights on in homes and businesses around the world, our work supports those who put their lives on the line to keep us safe. Bring your passion, potential and talents to Motorola Solutions, and help us usher in a new era in public safety and security.

Emergency Call Handling is the critical interface for the citizen into the command center, public safety workflow. Motorola Solution's is the leading software developer and solution provider for Emergency Call Handling, the software that enables 911 call centers to receive and process calls in Public Safety Answering Points across North America. The Emergency Call Handling solution team is

one business sleeve of the Motorola Solutions Software Enterprise where innovation of workflow enhancements are being developed for call handling, incident management, responder dispatching and situational awareness. This software developer position will be a member of the team working on software applications for Public Safety

Job Description

About the Role

We are seeking a motivated and tech-savvy Technical Support Analyst Intern to join our IT team. This internship offers hands-on experience in troubleshooting, diagnosing, and resolving technical issues, while providing exceptional support to end-users. The intern will work closely with our technical support team to resolve software, hardware, and network-related challenges, gaining valuable knowledge of IT systems and processes in a professional environment.

This opportunity is ideal for students or recent graduates who are eager to learn, develop technical skills, and contribute to the success of a dynamic team.

Job Responsibilities

We are seeking smart, self-motivated, enthusiastic software developers to help us design and deliver our Call Handling solution. Ideal candidates must be able to solve problems and seek to improve processes in innovative ways. To be successful in this role you must value teamwork and communication as well as working closely with other developers in small, dynamic, Agile teams. As a Software Engineer in this role, you must be adept at learning new technologies quickly.

This role will help with the following activities:
• expand the cloud tools and framework infrastructure,
•support teams usage of the cloud tools and framework infrastructures,
•implement dashboards,
•migrate to new DevOps tools.
and make use of the following technologies:
• Python, Java, C#, C++
•DevOps tools and Version Control Systems
•Continuous and progressive delivery tools
•Observability tools

In return for your expertise, we will support you in this new challenge with coaching & development every step of the way.
In addition, to reward your hard work you will get:
• A supportive and inclusive environment that fosters development and building lasting friendships.
•The opportunity to develop mission critical applications that help first responders make a difference when it matters.

EEO Statement

Motorola Solutions is an Equal Opportunity Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion or belief, sex, sexual orientation, gender identity, national origin, disability, veteran status or any other legally-protected characteristic.

We are proud of our people-first and community-focused culture, empowering every Motorolan to be their most authentic self and to do their best work to deliver on the promise of a safer world. If you'd like to join our team but feel that you don't quite meet all of the preferred skills, we'd still love to hear why you think you'd be a great addition to our team.

We're committed to providing an inclusive and accessible recruiting experience for candidates with disabilities, or other physical or mental health conditions. To request an accommodation, please complete this Reasonable Accommodations Form so we can assist you.

Job Requirements

Requirements:
• Willingness to learn and interest in the above-mentioned technologies.
•Fast learner with good communication skills.

•Advanced level of English (both written and oral).
•Able to troubleshoot and debug issues.
•Basic networking understanding.
•Basic analysis, unit testing and exploratory testing knowledge.
•Currently in a Computer Science, Information Technology or similar program.
•Practical knowledge, at least on a basic level, of one or more of the following technologies : Python, Java, C#.
•Experience of working in a Linux or/and Windows environment.

Nice-to-have requirements:
• Practical knowledge, at least on a basic level, of: Commercial Cloud Platform, NoSQL and/or SQL databases.
•Understanding of Agile Scrum.
•Experience of working in a CI/CD environment (Continuous Integration/Continuous Delivery).
•Working with large distributed agile teams.

Basic Requirements
Enrollment in an accredited college or university program with a graduation date of June 2026 or later.

Citizenship Requirement   N/A
