Job Description	

Who we are:

Geotab ® is a global leader in IoT and connected transportation and certified "Great Place to Work™." We are a company of diverse and talented individuals who work together to help businesses grow and succeed, and increase the safety and sustainability of our communities.

Geotab is advancing security, connecting commercial vehicles to the internet and providing web-based analytics to help customers better manage their fleets. Geotab's open platform and Geotab Marketplace ®, offering hundreds of third-party solution options, allows both small and large businesses to automate operations by integrating vehicle data with their other data assets. Processing billions of data points a day, Geotab leverages data analytics and machine learning to improve productivity, optimize fleets through the reduction of fuel consumption, enhance driver safety and achieve strong compliance to regulatory changes.

Our team is growing and we're looking for people who follow their passion, think differently and want to make an impact. Ours is a fast paced, ever changing environment. Geotabbers accept that challenge and are willing to take on new tasks and activities - ones

that may not always be described in the initial job description. Join us for a fulfilling career with opportunities to innovate, great benefits, and our fun and inclusive work culture. Reach your full potential with Geotab. To see what it's like to be a Geotabber, check out our blog and follow us @InsideGeotab on Instagram. Join our talent network to learn more about job opportunities and company news.

Who you are:

We are always looking for amazing talent who can contribute to our growth and deliver results! Geotab is seeking Software Developer Interns to help us deliver our MyGeotab cloud services. If you love technology, and are keen to join an industry leader - we would love to hear from you!

What you'll do:

As a Software Developer, your key areas of responsibility will be the design, implementation and deployment of MyGeotab. You will work closely with the Cloud Automation and Site Reliability teams to build resilient cloud systems to support our fleet tracking business. To be successful in this role, you should be a self-starter who can effectively collaborate with hybrid/remote teams. You should be interested in learning new architectures and design patterns. You should be familiar with object oriented design.

The opportunity:

• 8 - 12 month work-term beginning May 2026
• Full-time, paid internship: Monday - Friday, 37.5hrs/week.
• Your first week at Geotab begins with 'GEO Launch' - a one-week Employee Orientation. Click here to learn more!
• Learn more about the Geotab Campus Program here.
• This posting is for an existing vacancy.

How you'll make an impact:

• Learn C# and software design patterns
• Learn how our system is deployed in the cloud
• Assist and participate in code reviews
• Improve skills and knowledge of source control with Git
• Deliver quality code with high test coverage
• Working with platform improvements, maintenance, optimization and Object oriented design

Job Requirements

What you'll bring to the role:

• Pursuing a Degree/Diploma in Computer Science, Math, Software Engineering or a related field.
• Experience with developing applications for a Linux environment
• Experience with **object-oriented design, unit testing, optimization and multithreaded programming (C# and .Net/.Net Core preferred), Postgres, and SQL.**
• Experience with GBQ, Cloud Computing(GCP, AWS, Azure)
• Some experience with Typescript or Javascript, HTML, and CSS
• Excellent written and oral communication skills.

Citizenship Requirement   N/A

APPLICATION INFORMATION

Application Procedure   Through Employer Website
Special Application Instructions

Please click the "I intend to apply to this position" button on SCOPE and also submit your application via the employer's website.
