Job Description	

Who we are:

Geotab ® is a global leader in IoT and connected transportation and certified "Great Place to Work™." We are a company of diverse and talented individuals who work together to help businesses grow and succeed, and increase the safety and sustainability of our communities.

Geotab is advancing security, connecting commercial vehicles to the internet and providing web-based analytics to help customers better manage their fleets. Geotab's open platform and Geotab Marketplace ®, offering hundreds of third-party solution options, allows both small and large businesses to automate operations by integrating vehicle data with their other data assets. Processing billions of data points a day, Geotab leverages data analytics and machine learning to improve productivity, optimize fleets through the reduction of fuel consumption, enhance driver safety and achieve strong compliance to regulatory changes.

Our team is growing and we're looking for people who follow their passion, think differently and want to make an impact. Ours is a fast paced, ever changing environment. Geotabbers accept that challenge and are willing to take on new tasks and activities - ones

that may not always be described in the initial job description. Join us for a fulfilling career with opportunities to innovate, great benefits, and our fun and inclusive work culture. Reach your full potential with Geotab. To see what it's like to be a Geotabber, check out our blog and follow us @InsideGeotab on Instagram. Join our talent network to learn more about job opportunities and company news.

Who you are:

You are a curious and creative problem-solver who enjoys working at the intersection of data, analysis, and storytelling. You're excited by the challenge of turning complex datasets into clear, compelling narratives that help others better understand the world around them. In this role, you will analyze commercial vehicle telematics data to uncover insights about how real-world events - such as severe weather, construction projects, and policy changes - affect transportation patterns.

What you'll do:

As a Data Analysis & Communications Intern you'll create engaging visualizations and write blog-style content that makes data-driven insights accessible to a wide range of audiences. Along the way, you'll collaborate with cross-functional teams, apply analytical thinking, and refine your ability to communicate technical concepts in an engaging, approachable way. This role is ideal for someone who loves uncovering insights from data and is equally passionate about sharing those insights through writing, visual storytelling, or other creative formats. If you enjoy explaining complex topics clearly-or already create content through blogs, podcasts, or similar platforms - you'll thrive in this opportunity.

The opportunity:

• 8 - 12 month work-term beginning May 2026.
•Full-time, paid internship: Monday - Friday, 37.5hrs/week.
•Your first week at Geotab begins with 'GEO Launch' - a one-week Employee Orientation. Click here to learn more!
•Learn more about the Geotab Campus Program here.
•This posting is for an existing vacancy.

How you'll make an impact:

• **Analyze commercial vehicle telematics data** to identify patterns and trends in "before and after" scenarios following events like severe weather, construction activity, or policy implementation.
•**Design and create data visualizations** that clearly communicate your findings - we encourage creativity and experimentation with visual formats.
•**Write and publish blog posts** (weekly or bi-weekly) that combine your analysis, visualizations, and narrative to tell compelling stories about transportation dynamics.
•**Collaborate with cross-functional teams** to identify interesting research questions and refine your analytical approach - collaboration between data science, product, marketing, and strategic communications teams is essential to ensure your research is technically sound, product-aligned, and strategically valuable.
•**Manage a consistent publication schedule** while maintaining quality and accuracy in your work.
Job Requirements

What you'll bring to the role:

• **Education & Background:**
• Currently pursuing or recently completed a degree in data science, statistics, journalism, communications, urban planning, geography, economics, or related field
•Demonstrated interest in both quantitative analysis and qualitative communication
•**Technical Skills**:
• Experience with data analysis using tools such as Python (pandas), SQL
•Ability to create visualizations using tools like plotly, kepler.gl, or similar platforms
•Comfort working with large datasets and performing comparative statistical analysis

•**Communication & Creative Skills:**
• Strong writing skills with the ability to explain technical concepts to non-technical audiences
•Portfolio of writing samples (blog posts, articles, newsletters, etc.) demonstrating your ability to make data engaging [bonus qualification, not required]
•Interest in visual storytelling and design
•Examples of creative projects (personal blog, podcast, YouTube channel, social media presence) that showcase your communication style [bonus qualification, not required]
•**Work Style & Mindset:**
• Self-motivated with strong time management skills to meet regular publishing deadlines
•Attention to detail and commitment to accuracy in both analysis and writing
•Curiosity about transportation, urban systems, policy impacts, or related fields
•Enthusiasm for data advocacy-you believe data should inform and inspire action
•Comfort with iteration and incorporating feedback

Citizenship Requirement   N/A
