About QuadReal Property Group

QuadReal Property Group is a global real estate investment, operating and development company headquartered in Vancouver, British Columbia. Its assets under management are $94 billion. From its foundation in Canada as a full-service real estate operating company, QuadReal has expanded its capabilities to invest in equity and debt in both the public and private markets. QuadReal invests directly, via programmatic partnerships and through operating platforms in which it holds an ownership interest.

QuadReal seeks to deliver strong investment returns while creating sustainable environments that bring value to the people and communities it serves. Now and for generations to come.

QuadReal: Excellence lives here.

We are committed to providing our Co-ops/Interns with a student experience that provides a supportive and engaging learning environment while developing skills and business acumen. Students will have the opportunity to participate in a variety of experiences including our Speaker Series, Fireside Chats, Volunteer opportunities and Networking events.

Eligibility Note: To qualify for a student (Co-op/Internship) opportunity, students must be enrolled in their academic studies at a post-secondary institution (university/college) and must be returning to school after completion of their work term with QuadReal. If you are a student registered in an official co-op program at your post-secondary institution and completion of a final work term is a mandatory component for you to graduate, you are eligible to apply with the understanding that you will leave QuadReal at the end of your work term or have the possibility to be considered for full-time opportunities.

We are seeking an enthusiastic and driven Co-op/Intern to join our Integration Team in Toronto or Vancouver. Reporting to the Director of Integration, you will actively contribute to the day-to-day operations and play a vital role in our ongoing efforts to streamline and enhance our IT environment. This internship offers a unique opportunity to gain hands-on experience in integration, working alongside our talented team to understand integration requirements, optimize existing systems, implement new solutions, and improve our processes and tools, and participate in implementation and integration testing.

What We Offer:
• An organization and leaders that support your development through meaningful work experience
• A Student Mentorship Program designed to provide support throughout your experience
• Opportunities to build your industry knowledge through weekly Speaker Series & Fireside Chats
• Opportunities to participate in case competitions within QuadReal during your work term, fostering cross-functional collaboration with intern peers and enhancing exposure to real-world problem-solving.
• Giving back to the community with your peers and team members through volunteering events
• Opportunities to build long-lasting industry and professional relationships

What You Will Experience:
Integration Requirements:
• Collaborate with project stakeholders to gather and document integration requirements.
• Assist in translating business requirements into technical integration solutions.
Integration Support & Implementation:
• Collaborate with the integration development team to design and implement integration solutions, including configuring integrations, developing custom connectors, and scripting data transformations using Anypoint Studio.
• Monitor existing integrations, triage production issues, and recover automated integrations to ensure seamless business functionality
DevOps Process Analysis and Improvement:
• Work with the DevOps team to analyze current integration processes.
• Identify areas for improvement and help implement process enhancements to streamline integration workflows.
Azure Integration Services:
• Explore Azure Integration Services to develop integrated solutions that connect on-premises and cloud-based applications and services. Analyze and implement Azure Integration Services as an alternative to MuleSoft for specific use cases
API and Network Security:
• Create and manage PGP and SSH keys to ensure encryption standards are met when integrating with other systems.
• Work closely with the infrastructure team to handle integration network requests, such as IP whitelisting and managing inbound and outbound connections from the cloud.
• Manage API security policies and rules for all integration APIs.
Documentation:
• Maintain detailed documentation of integration processes, configurations, and best practices.
• Assist in creating user guides and knowledge base articles for team reference.

Collaboration and Learning:

• Collaborate with cross-functional teams, including developers, architects, and business analysts.

• Continuously learn and stay updated on industry trends and best practices in integration technologies, particularly MuleSoft.

Job Requirements

What You Will Bring:

• Currently enrolled in an academic program in Computer Science, Software Development, or Information Technology

• Understanding of Programming Languages and how to work with Application Programming Interfaces (APIs) is fundamental. This includes knowledge of RESTful APIs, SOAP APIs, GraphQL, and more

• Familiarity with middleware and Enterprise Service Bus (ESB) technologies such as MuleSoft, Azure Data Factory or TIBCO is valuable

• Proficiency in working with databases (SQL and NoSQL) is necessary as data often needs to be retrieved, manipulated, and stored

• Familiarity with integration patterns like publish-subscribe, point-to-point, request-reply, and event-driven architectures

• Effective communication is crucial to understand business requirements and collaborate with cross-functional teams

• The technology landscape is constantly evolving, so a willingness to learn and adapt to new tools and techniques is vital

Citizenship Requirement   N/A
