About QuadReal Property Group

QuadReal Property Group is a global real estate investment, operating and development company headquartered in Vancouver, British Columbia. Its assets under management are $94 billion. From its foundation in Canada as a full-service real estate operating company, QuadReal has expanded its capabilities to invest in equity and debt in both the public and private markets. QuadReal invests directly, via programmatic partnerships and through operating platforms in which it holds an ownership interest.

QuadReal seeks to deliver strong investment returns while creating sustainable environments that bring value to the people and communities it serves. Now and for generations to come.

QuadReal: Excellence lives here.

www.quadreal.com

We are committed to providing our Co-ops/Interns with a student experience that provides a supportive and engaging learning environment while developing skills and business acumen. Students will have the opportunity to participate in a variety of experiences including our Speaker Series, Fireside Chats, Volunteer opportunities and Networking events.

Eligibility Note: To qualify for a student (Co-op/Internship) opportunity, students must be enrolled in their academic studies at a post-secondary institution (university/college) and must be returning to school after completion of their work term with QuadReal. If you are a student registered in an official co-op program at your post-secondary institution and completion of a final work term is a mandatory component for you to graduate, you are eligible to apply with the understanding that you will leave QuadReal at the end of your work term or have the possibility to be considered for full-time opportunities.

As a Data Engineering Intern on our Enterprise Data Platform (EDP) team, you will play a key role in supporting the infrastructure that powers data-driven decision-making at QuadReal. Working as part of the Enterprise Data & Analytics (ED&A) function, you'll help build, operate, and enhance a modern, reliable data platform-ensuring that business users across the company can access high-quality, trusted data when they need it most. This internship offers a unique opportunity to gain hands-on experience with Microsoft Fabric, open-source data tools, and platform automation-while collaborating with professionals across Data Engineering, Analytics, and Governance.

What We Offer:
• An organization and leaders that support your development through meaningful work experience
•A Student Mentorship Program designed to provide support throughout your experience
•Opportunities to build your industry knowledge through weekly Speaker Series & Fireside Chats
•Opportunities to participate in case competitions within QuadReal during your work term, fostering cross-functional collaboration with intern peers and enhancing exposure to real-world problem-solving.
•Giving back to the community with your peers and team members through volunteering events
•Opportunities to build long-lasting industry and professional relationships

What You Will Experience:
• Help build and operate our next generation cloud data platform in Microsoft Fabric.
•Build and manage data pipelines using tools like dltHub and Airflow.
•Automate core platform processes using Infrastructure as Code (IaC) tools, such as Terraform.
•Support the implementation and monitoring of data quality and compliance frameworks.
•Develop dashboards to monitor platform observability, including health, data quality and other performance metrics.
•Collaborate across teams to promote enterprise data governance and standardization.

This job posting is for a newly created role within our organization.

The expected hourly rate for this role is $28.

Job Requirements

What You Will Bring:
• Currently enrolled in an academic program, preferably in Engineering, Science, Technology or Mathematics.
•Strong quantitative and analytical skills; detail-oriented and proficient in building and working with complex data sets.
•Proficiency in SQL, Python, and data engineering principles (e.g. Warehousing, ETL/ELT).
•Familiarity with cloud platforms (i.e. Azure, AWS, or GCP), dbt, data orchestration tools (e.g., Airflow), and CI/CD practices is considered an asset.
•The ability to problem-solve while working in a fast-paced environment.
•Excellent communication and presentation skills; ability to effectively communicate technical concepts and project outcomes.

Citizenship Requirement   N/A
