About AppLovin

AppLovin makes technologies that help businesses of every size connect to their ideal customers. The company provides end-to-end software and AI solutions for businesses to reach, monetize and grow their global audiences. For more information about AppLovin, visit: www.applovin.com.

To deliver on this mission, our global team is composed of team members with life experiences, backgrounds, and perspectives that mirror our developers and customers around the world. At AppLovin, we are intentional about the team and culture we are building, seeking candidates who are outstanding in their own right and also demonstrate their support of others.

Fortune recognizes AppLovin as one of the Best Workplaces in the Bay Area, and the company has been a Certified Great Place to Work for the last four years (2021-2024). Check out the rest of our awards HERE.

Wurl is seeking a motivated and talented Software Engineering Intern to join our dynamic engineering team. As an intern, you will gain hands-on experience in developing and maintaining software solutions that power our AdTech and CTV platforms. You will work closely with experienced engineers and contribute to projects that impact millions of viewers.

What You'll Do

• Collaborate with the engineering team to design, develop, test, and deploy software applications.

•Participate in code reviews and contribute to the development of best practices and coding standards.

•Assist in troubleshooting and resolving software defects and issues.

•Write clean, efficient, and maintainable code with corresponding unit tests.

•Develop and maintain documentation for software features and functionality.
•Stay up-to-date with industry trends and emerging technologies in AdTech and CTV.

What We Offer
• Paid internship ($30/hr) with flexible scheduling.
•Remote-first work culture and support.
•Mentorship from experienced engineers and product experts.

AppLovin has become aware of a scam targeting jobseekers with fake "app optimization" and similar roles. We do not ask our candidates to download apps or make any form of payment(s). AppLovin works with applicants through our Careers page and applovin.com email addresses. If you are contacted through other unofficial channels (such as WhatsApp or Telegram) or asked to download an app or make a payment, these contacts are not legitimate. Confirm the information here and contact us directly with any questions.

AppLovin is proud to be an equal opportunity employer that is committed to inclusion and diversity. All applicants will be considered for employment without attention to race, color, religion, sex, sexual orientation, gender identity, national origin, veteran or disability status, or other legally protected characteristics. Learn more about EEO rights as an applicant here.

If you need assistance and/or a reasonable accommodation due to a disability during the application or recruiting process, please send us a request at accommodations@applovin.com.

AppLovin will consider for employment all qualified applicants with criminal histories in a manner consistent with applicable law. If you're applying for a position in California, learn more here.

To support an efficient and fair hiring process, we may use technology-assisted tools, including artificial intelligence (AI), to help identify and evaluate candidates. All hiring decisions are ultimately made by human reviewers.

Job Requirements

What You Bring
• Currently pursuing a Bachelor's or Master's degree in Computer Science, Software Engineering, or a related field.
•Strong programming skills in languages such as Python, JavaScript.
•Understanding of common data structures and algorithms.
•Familiarity with web development technologies frameworks (e.g., React, Angular, or Vue.js).
•Knowledge of database systems (SQL).
•Understanding of software development methodologies and tools (e.g., Agile, Git).
•Excellent problem-solving and analytical skills.
•Strong communication and teamwork abilities.
•Passion for technology and a desire to learn and grow in a fast-paced environment.

Nice to Have
• Experience with cloud platforms (e.g., AWS, Azure, Google Cloud).
•Knowledge of AdTech technologies and concepts.
•Familiarity with CTV platforms and OTT (Over-The-Top) video streaming applications.

Citizenship Requirement   N/A
