Job Title: Frontend Engineer Intern - Fall 2025 (Remote)

Job ID: R24199

As a global leader in cybersecurity, CrowdStrike protects the people, processes and technologies that drive modern organizations. Since 2011, our mission hasn't changed - we're here to stop breaches, and we've redefined modern security with the world's most advanced AI-native platform. Our customers span all industries, and they count on CrowdStrike to keep their businesses running, their communities safe and their lives moving forward. We're also a mission-driven company. We cultivate a culture that gives every CrowdStriker both the flexibility and autonomy to own their careers. We're always looking to add talented CrowdStrikers to the team who have limitless passion, a relentless focus on innovation and a fanatical commitment to our customers, our community and each other. Our University Recruiting program is dedicated to attracting and cultivating the future leaders of this industry. This program offers paid positions for students and recent grads, designed to provide exposure to work that makes an impact while being supported through a structured experience with seasoned professionals. Ready to join a mission that matters? The future of cybersecurity starts with you.

About the Role:

As a Frontend Engineer Intern at CrowdStrike, you will work with a talented and dedicated team to build and maintain the user interface for the Falcon platform. You will provide a high-quality user experience that our customers around the world use 24/7 to protect their systems from the most sophisticated adversaries.

Our JavaScript framework is Ember, but if you've used React, Angular, or Vue.js, you'll feel right at home, and we'll help you get comfortable with both Ember and our codebase. Since we only support evergreen browsers, we can push the boundaries of what's possible on the web platform while working with truly massive amounts of data. Our ideal candidates are sensitive to the needs of the users and love to find solutions in a unique and dynamic problem space.

We're a highly collaborative and friendly group that prizes collaboration over competition. We provide opportunities to learn new skills, mentor fellow engineers, and contribute to the direction of both the team and the products for which we're responsible. We work in a distributed, remote-first, high-trust environment where you manage your own time and have the flexibility to balance your

work and personal life.

What You'll Do:

• Build and maintain single page web applications written in JavaScript using Ember.js.

•Participate in the code review process.

•Take initiative and build tools that improve your team's development experience.

•Write automated tests for your code.

•Collaborate with fellow UX Engineers, Cloud Engineers, UX Designers.

•Continually learn about the ever-evolving challenges and complexities of the cybersecurity industry.

•Have fun solving hard problems.

Location - Fully Remote:

The Engineering Internship is fully remote and requires no travel. Your work location is the city/town/province you will be working from remotely. For our 12 - 16 week internship program (pending candidate availability), interns are allowed to work remotely from an alternative location for up to 2 weeks. Interns are also invited to work out of the CrowdStrike office located closest to their remote location.

#LI-Remote

#LI-AL2

What You Can Expect:

• Remote-friendly and flexible work culture

•Market leader in compensation and equity awards

•Paid holidays (including birthday holidays) and 401k matching (where applicable)

•Professional development opportunities including workshops, tech talks, and Executive Speaker Series

•Assigned mentors from across the company for continuous support and feedback

•Participation in companywide initiatives including ERGs, FalconFIT, Wellness Programs, and Employee Assistance Program

•Employee Networks, geographic neighborhood groups, and volunteer opportunities to build connections

•Vibrant office culture with world class amenities

•Ownership of impactful projects that move the company forward

•Great Place to Work Certified™ across the globe

CrowdStrike is proud to be an equal opportunity employer. We are committed to fostering a culture of belonging where everyone is valued for who they are and empowered to succeed. We support veterans and individuals with disabilities through our affirmative action program.

CrowdStrike is committed to providing equal employment opportunity for all employees and applicants for employment. The Company does not discriminate in employment opportunities or practices on the basis of race, color, creed, ethnicity, religion, sex (including pregnancy or pregnancy-related medical conditions), sexual orientation, gender identity, marital or family status, veteran status, age, national origin, ancestry, physical disability (including HIV and AIDS), mental disability, medical condition, genetic information, membership or activity in a local human rights commission, status with regard to public assistance, or any other characteristic protected by law. We base all employment decisions--including recruitment, selection, training, compensation, benefits, discipline, promotions, transfers, lay-offs, return from lay-off, terminations and social/recreational programs--on valid job requirements.

If you need assistance accessing or reviewing the information on this website or need help submitting an application for employment or requesting an accommodation, please contact us at recruiting@crowdstrike.com for further assistance.

Right to Work

CrowdStrike, Inc. is committed to equal pay for equal work in its compensation practices. The hourly rate for this position is $38 - $45

CrowdStrike Canada ULC is committed to equal pay for equal work in its compensation practices. The hourly rate for this position is $38 - $45 This is Canadian-based employment, and it is expected that all employees maintain legal entitlement to work in Canada. Applicants selected to move forward in the hiring process are subject to background checks, including but not limited to criminal record, credit, and/or reference checks.

Job Requirements

What You'll Need:

- Currently enrolled at a 4-year university, currently working towards a CS/Engineering degree, graduating between December 2025 - August 2026.
- A good understanding of JavaScript and high level experience building web application user interfaces with modern frameworks such as Ember, React, Angular, or Vue.
- HTML & CSS skills, including experience with CSS pre- or post-processors (like Sass or PostCSS) and CSS frameworks like Tailwind CSS.
- Knowledge in testing frameworks, tools and methodologies such as QUnit, Mocha & Selenium.
- Knowledge & interest in developing genuinely accessible interfaces.
- Comfortable with Git or similar version control systems and workflows.
- A desire to work closely with others to deliver quality software and solve problems.

Bonus Points:

- Familiarity with client-side build processes and tools (e.g. Ember CLI, Webpack, etc.).
- Experience creating or contributing to open source projects.
- Experience with graphics and visualization tools such as D3 or Three.js.
- Experience with frontend performance measurement and optimization.

Citizenship Requirement   N/A
