Revvity | About Us

Revvity is a developer and provider of end-to-end solutions designed to help scientists, researchers, and clinicians solve the world's greatest health challenges. We pair the enthusiasm of an industry disruptor with the experience of a longtime leader. Our team of 11,000+ colleagues from around the globe are vital to our success and the reason we're able to push boundaries in pursuit of better human health.

Find your future at Revvity.

About you:
You're passionate about artificial intelligence, with a particular interest in how generative AI and large language models (LLMs) can transform business operations. You embody our core values:
Embrace the unknown: You start each day with a "What if?" mindset, ready to explore how AI can revolutionize traditional business processes.
Partner with purpose: You're excited to work alongside diverse teams, using AI to accelerate positive outcomes across all departments.
Passion for people: You understand that AI's true potential lies in augmenting human capabilities, not replacing them.
Collaborate for success: You thrive in team environments, putting collective goals before individual recognition, and valuing

transparency and integrity in your work.

You're a self-starter, comfortable with ambiguity, and excited by the prospect of applying cutting-edge AI technologies to real-world business challenges.

What you'll do:

Within 30 days

• Complete onboarding, gaining familiarity with our enterprise systems and ongoing AI initiatives

•Provide feedback on your onboarding experience, embodying our value of continuous improvement

•Build relationships across various departments to understand their unique challenges and AI opportunities

•Gain a basic understanding of our business operations and how AI can enhance productivity

Beyond 60 days

• Develop prototypes and proof-of-concepts for AI-powered features that can boost employee productivity and creativity

•Assist in fine-tuning and optimizing LLMs for specific enterprise use cases (e.g., report writing, data analysis, creative ideation)

•Contribute to the development of prompt engineering strategies for various business applications

•Participate in creating AI-driven tools that can be integrated into our existing workflow systems

•Collaborate on AI model integration projects, ensuring seamless user experiences across different platforms

•Assist in evaluating and benchmarking AI model performance against business KPIs and user satisfaction metrics

•Present your work and findings to stakeholders, translating complex AI concepts for both technical and non-technical audiences

Our Values in Action:

• **Embrace the unknown**: Be prepared to tackle unprecedented challenges in applying AI to diverse business functions.

•**Partner with purpose**: Collaborate closely with employees across all levels to understand and meet their AI-driven needs.

•**Passion for people**: Focus on developing AI solutions that empower and uplift our workforce.

•**Collaborate for success**: Embrace teamwork, transparency, and integrity as we integrate AI into our corporate culture.

This internship offers a unique opportunity to work at the forefront of enterprise AI application. Join us in shaping the future of AI-driven business innovation and employee empowerment!

Job Requirements

Requirements:

• Strong interest in enterprise AI applications

•Familiarity with popular LLMs such as ChatGPT, Claude, or others

•Familiarity with python, Next.JS, Docker and full stack technologies

•Basic understanding of prompt engineering concepts

•Proficiency in at least one programming language (Python preferred)

•Knowledge of machine learning concepts and frameworks (e.g., TensorFlow, PyTorch)

•Ability to work in a fast-paced, rapidly changing environment

•Strong problem-solving skills and meticulous attention to detail

•Excellent communication skills, both written and verbal

•Bonus: Understanding of business processes and enterprise software systems

Citizenship Requirement   N/A
