Job Description

About Kinaxis

In 1984, we started out as a team of three engineers. Today, we have grown to become a global organization with over 2000 employees around the world, with a brand-new HQ based in Kanata North in Ottawa. As one of Canada's Top Employers for Young People (2024), we want to help you take the first step in crafting your career journey.

At Kinaxis, we power the world's supply chains to help preserve the planet's resources and enrich the human experience. As a global leader in end-to-end supply chain management, we enable supply chain excellence for all industries, with more than 40,000 users in over 100 countries. We are expanding our team as we continue to innovate and revolutionize how we support our customers.

Location

This is a hybrid position. You must be in the Ottawa, Canada office, at least three days a week.

About the Team

Maestro is a world-class, unique technology providing lightning fast calculations and powerful collaboration capabilities via its 1TB memory-based database, always-on analytics, simulation tools, and rich UI. In this role, you will develop web application features

using a variety of technologies (TypeScript, React, C#) that will bring the power of Maestro to an expanding user community.

This is a full-time, 8 to 12-month position, starting January 2026 and is open only to students in a registered Co-op Program in Ontario.

What you will do
• Develop high quality code for the Maestro web client and application server
•Enhance product quality by fixing bugs, writing tests, and improving product performance
•Grow our design system by contributing to our reusable component library
•Collaborate with the development, QA, and UX teams in delivering new features

Job Requirements

What we are looking for
• Currently enrolled in, or recently graduated from, a program where software development is the primary focus
•Experience building web applications, personal projects on GitHub
•Open mindset for learning and improving
•Strong problem-solving and communication skill
Things that would definitely help
• TypeScript, JavaScript, C#
•A front end framework like React, Vue, Angular, etc.
•Unit testing, end to end testing
•Functional programming
•CSS, CSS in JS
•REST APIs
Citizenship Requirement   N/A
