Job Description	

Working at Atlassian

Atlassians have the flexibility to work where they can collaborate most effectively with their team, whether at home, one of our global offices, or both.

As a distributed-first company, all interviews are conducted virtually. We hire in any country where we have a legal entity. Learn how we work at go.atlassian.com/distributed.

Your Future Org

Atlassian's Intern program combines hands-on technical training, professional growth opportunities, dedicated mentorship, and strong social connections. This holistic approach empowers students to hit the ground running and sets them up for a successful and meaningful career at Atlassian!

This position is based in British Columbia. To be considered, candidates must be willing and able to work from this location.

• *Our intern roles are **not** eligible for Canada work visa sponsorship now or in the future. Candidates with student work permit or any open work permit are welcome to apply.*

Your Future Team

As an intern in our world-class Data Engineering team, you'll influence product teams, inform Data Science and Analytics Platform teams, and partner with data consumers and products to ensure the quality and usefulness of data assets. You will help strategize measurement, collect data, and generate insights.

This work will help understand and improve product experience and engagement, improve efficiency and costs, and guide strategy. You'll report to a Data Engineering Manager and learn from your team mentor, who is one of the best Data Engineers in the

business.

Responsibilities

Data Engineering is a multi-faceted role, where you can have a focused or a broad set of responsibilities, including:

• Define metrics
•Instrument logging
•Acquire/ingest data
•Architect & modeling data
•Transform data
•Ensure data quality, governance, and enablement
•Alerting, visualization, and reporting
•Develop at scale and improve efficiency

Compensation

At Atlassian, we strive to design equitable, explainable, and competitive compensation programs. To support this goal, the baseline of our range is higher than that of the typical market range, but in turn we expect to hire most candidates near this baseline. Base pay within the range is ultimately determined by a candidate's skills, expertise, or experience. In the Canada, we have one geographic pay zone. For this role, our current base pay range for new hires in this zone are:

Zone A: $38.00/hr - $43.00/hr CAD

This role may also be eligible for benefits, bonuses, commissions, and equity.

Benefits and Perks

Atlassian offers a wide range of perks and benefits designed to support you, your family and to help you engage with your local community. Our offerings include health and wellbeing resources, paid volunteer days, and so much more. To learn more, visit Atlassian Internships: Students and New Grads | Atlassian

About Atlassian

At Atlassian, we're motivated by a common goal: to unleash the potential of every team. Our software products help teams all over the planet and our solutions are designed for all types of work. Team collaboration through our tools makes what may be impossible alone, possible together.

We believe that the unique contributions of all Atlassians create our success. To ensure that our products and culture continue to incorporate everyone's perspectives and experience, we never discriminate based on race, religion, national origin, gender identity or expression, sexual orientation, age, or marital, veteran, or disability status. All your information will be kept confidential according to EEO guidelines.

To provide you the best experience, we can support with accommodations or adjustments at any stage of the recruitment process. Simply inform our Recruitment team during your conversation with them.
