Job Description

Student, IT Automation

At Fidelity, we've been helping Canadian investors build better financial futures for over 35 years. We offer individuals and institutions a range of trusted investment portfolios and services - and we're constantly seeking to find new and better ways to help our clients. As a privately owned company, we boldly embrace innovation in all areas as we continue to grow our business into the future.

Working with us means you'll be part of a diverse and dedicated group of people who make a real difference for our clients and communities every day. You'll have a wide range of opportunities to grow and develop your career in an inclusive environment where you'll feel valued and supported to be your best - both personally and professionally.

What we provide:

Fidelity offers you the chance to build a career, develop professionally and explore different career paths throughout the company. Students are placed into an area of interest and will be provided with a mentor to support them throughout their journey. We offer our students an extensive training program to help enhance skills in communication, public speaking, networking, business etiquette and emotional intelligence. Fidelity proudly supports various non-profit organizations and provides students with the opportunity to volunteer to make a difference in their community. You've worked hard to prepare yourself for a great career. No matter what your undergraduate degree is in, there is an opportunity for you at Fidelity.

How you'll make an impact:

As a **student in IT Automation**, your focus will be to develop test automation for our website and other internal web applications. You will be empowered to investigate new technologies and processes that will add value to our organization.

You will have the opportunity to:

• Develop automated test scripts using Katalon Studio while learning about Fidelity's business models and applications.

• Execute and schedule automated test scripts on VMs/VDIs using CI/CD tools like Jenkins or GitHub Actions.

• Create and execute load and performance tests for our website and internally on newly developed applications and tools.

• Review technologies and best practices that may be beneficial to our organization.

• Collaborate with experienced IT Automation Developers to discuss test coverage, participate in peer code reviews, and adopt industry best practices for code quality and maintainability.

• Present your work to subject matter experts (SMEs) in feedback sessions to refine solutions and align with business objectives

Job Requirements

What we're looking for:

• You are working towards a university degree in Computer Science or Computer/Mechatronic/System Design Engineering - ideally in your 1st or 2nd year of study.

• You have a keen interest and knowledge of Web and Mobile development.

• You have a strong understanding of Internet programming languages, including Java, JavaScript, HTML/HTML5 technologies, CSS, CSS3 and jQuery libraries.

• You have previous knowledge of scripting languages such as Groovy, Python, Ruby, Perl and Linux/Unix shell would be an asset.

• You must be currently enrolled in a registered co-op program to be considered for this position

• You must also be available for the full duration of the co-op term

Citizenship Requirement   N/A

APPLICATION INFORMATION

Application Procedure   Through Employer Website

Special Application Instructions

Please click the "I intend to apply to this position" button on SCOPE and also submit your application via the employer's website.
