Job Description	

WHAT MAKES US EPIC?

At the core of Epic's success are talented, passionate people. Epic prides itself on creating a collaborative, welcoming, and creative environment. Whether it's building award-winning games or crafting engine technology that enables others to make visually stunning interactive experiences, we're always innovating.

Being Epic means being a part of a team that continually strives to do right by our community and users. We're constantly innovating to raise the bar of engine and game development.

PROGRAMMING - EPIC GAMES SERVICES

What We Do

Driving the plug-in power behind Unreal Engine 5. We bridge connections for licensees and our own internal game teams to online services. This allows games like Fortnite to utilize a combination of platform online services as well as Epic's own online services to build cross-platform online features. Login, parties, voice chat, matchmaking, purchasing, cloud storage, and analytics are just a few examples of online features that our Online Game Services team helps games utilize.

ECOMMERCE PROGRAMMER INTERN

What You'll Do

We are looking for a motivated and curious Backend Programming Intern to join our programming team. As a backend intern, you will contribute to the development of APIs, services, and infrastructure that support our eCommerce platform. You'll work closely with experienced developers to gain hands-on experience with backend technologies, development workflows, and scalable software systems.

In this role, you will
• Assist in the design and development of backend services, APIs, and database models
•Write clean, maintainable code and participate in code reviews
•Collaborate with frontend programmers, designers, and product managers to build features
•Help troubleshoot bugs and optimize performance across systems
•Learn and apply best practices for building secure, scalable web services
•Support integration with third-party services and tools

Job Requirements

What we're looking for
• Currently pursuing a degree in Computer Science, Software Programming, or a related field
•Strong programming fundamentals (data structures, algorithms, etc.)
•Experience with at least one backend language (Java preferred)
•Familiarity with RESTful APIs and basic web protocols
•Exposure to SQL or NoSQL databases (e.g.PostgreSQL, MongoDB)
•Strong problem-solving skills and eagerness to learn
•Familiarity with Docker or containerized environments, Interest in cloud platforms (AWS)
•Personal or school projects that demonstrate backend development
•Ability to communicate clearly and work effectively in a collaborative environment
This internship has a flexible start date in 2026. Recruitment will be ongoing until teams find an ideal match. Applicants must be legally authorized to work in the posting location for the duration of the internship. For more information about Epic's Early Career Program, visit epicgames.com/earlycareers. This is going to be Epic!
