Job Description	

Introduction

At IBM Enablement Developers , we work closely with the sellers to help develop and deliver applications to support their selling.We use cirrus, devops AI, and a lot of memes to provide powerful tools to help selling.

We offer a great working environment with the latest tool and the smartest people. You'll have ultimate flexibility in choosing technologies. We guarantee continuous learning at the cutting edge of everything tech. By joining our team, you will establish your eminence in the industry.

Your role and responsibilities

We're looking for a developer to support our sales mission of creating applications, front and backend with integrated AI to support the sales community. In this role, you'll be using React, Angular, NeuralSeek, Watsonx, Mongo, Db2, and Node, to create applications.

Key responsibilities:

• Maintain existing applications - Angular, React, Node, DB2, Mongo
•Work in front and and backend
•Update Databases
•Create new innovations in the fast-paced AI environment

Job Requirements

Required education
High School Diploma/GED
Preferred education

Bachelor's Degree

Required technical and professional expertise

• Solid understanding of coding principles

•Fluency in at least one language

•Excellent English

Preferred technical and professional experience

• Experience or knowledge of one of the full stack languages: Angular, React, Mongo or DB2

•Experience or knowledge of APIs - GET, POST, PUT...

OTHER RELEVANT JOB DETAILS

Must have the ability to work in Canada without sponsorship.

This role will involve working with technology that is covered by Export Regulations sanctions. If you are a Foreign National from any of the following US sanctioned countries (Cuba, Iran, North Korea, Syria, and the Crimea, Luhansk, Donetsk, Kherson, and Zaporizhia regions of Ukraine) on a work permit, you are not eligible for employment in this position.

Citizenship Requirement   N/A
