Job Description	

Job Summary:

We have an opportunity for a Software Developer - Web/Cloud Application, Co-op to join our IoT System Products team in Richmond.

Responsibilities:

You will be responsible for the on-time delivery of stable, production ready application software meeting the product requirements and constraints. These include requirements analysis, design, implementation, testing, integration, configuration and documentation for the assigned sub-systems or features.

Job Requirements

Minimum Qualifications:

3rd or 4th year in Electrical or Computer Engineering, or Computer Science with a system focus (software);

Experience in the following areas:
• Developing software applications using Java and/or Javascript

•Front-end frameworks such as React, Vue.js, etc.
•Relational databases like MySQL, PostgreSQL, etc.
•Linux based software development
•Web application development
•Knowledge in core AWS services and Docker containers

Desired Qualifications
• A proactive nature, willing to take initiative and seek challenges, balancing known risks against time to meet objectives in a
  systematic approach;
•Resourceful self-starter with strong interpersonal and communication skills;
•Works well both individually and within a team and takes pride in the overall achievement of the team as well as personal
  accomplishments.

Citizenship Requirement   N/A
