Job Description

About Boomi and What Makes Us Special

Are you ready to work at a fast-growing company where you can make a difference? Boomi aims to make the world a better place by connecting everyone to everything, anywhere. Our award-winning, intelligent integration and automation platform helps organizations power the future of business. At Boomi, you'll work with world-class people and industry-leading technology. We hire trailblazers with an entrepreneurial spirit who can solve challenging problems, make a real impact, and want to be part of building something big. If this sounds like a good fit for you, check out boomi.com or visit our Boomi Careers page to learn more.

Location: Vancouver, BC

Hybrid - In-Office 3 Days, Remote 2 Days

Position Overview: We are looking for a motivated and enthusiastic Engineering Intern to join our talented engineering team. This internship provides an excellent opportunity for students enrolled in computer science, software engineering, or a related field to gain hands-on experience in software development, project collaboration, and technology implementation within a dynamic environment.

What you'll do:

• Software Development: Assist software engineers in designing, developing, testing, and debugging applications and features within the Boomi platform.

• Collaboration: Work in a collaborative team environment, participating in code reviews, team meetings, and project discussions to gain insights into Agile development processes.

• Product Testing: Help develop and execute unit tests, integration tests, and user acceptance tests to ensure software quality and

functionality.

•Documentation: Contribute to the creation and maintenance of technical documentation, including design specifications, user manuals, and process documentation.

•Research and Analysis: Conduct research on emerging technologies and best practices to support engineering initiatives and recommend improvements.

•Troubleshooting: Assist in identifying and resolving technical issues by analyzing logs, debugging code, and working with other team members.

Job Requirements

The Experience You Bring:

• Currently enrolled in a Bachelor's or Master's program in Computer Science, Software Engineering, or a related field.

•Familiarity with programming languages such as Java, Python, or JavaScript.

•Understanding of software development principles and methodologies, including Agile and DevOps practices.

•Problem-solving skills and the ability to think critically about software functionality and performance.

•Strong communication and teamwork abilities, with a willingness to learn from others.

•Eagerness to take on new challenges and apply theoretical knowledge in practical, real-world scenarios.

•Experience using AI tools such as Claude Code, Cursor, AWS Q, etc.

Citizenship Requirement   N/A

APPLICATION INFORMATION

Application Procedure   Through Employer Website

Special Application Instructions

==Please click the "I intend to apply to this position" button on SCOPE and also submit your application via the employer's website.==
