The role: Software Developer Co-Op Student - 4 or 8-month Co-Op term

Key Responsibilities

- Assist with the design, development, testing, and maintenance of software applications under the guidance of senior developers.
- Write clean, maintainable, and well-documented code following established coding standards and best practices.
- Support troubleshooting and debugging of applications to resolve defects and improve performance.
- Participate in code reviews and incorporate feedback to improve technical and professional skills.
- Help document technical designs, processes, and solutions.
- Contribute to automation, enhancements, or small feature development as assigned.

Team Participation

- Work collaboratively within an agile or iterative development team.
- Participate in daily stand-ups, sprint planning, retrospectives, and team meetings.
- Communicate progress, challenges, and ideas clearly with team members and leaders.
- Learn from senior developers, analysts, and architects through mentorship and hands-on experience.
- Demonstrate professionalism, accountability, and a willingness to learn in a team-based environment.

Job Requirements

Education

- Currently enrolled in a recognized **post-secondary co?op program** in:
- Computer Science
- Software Engineering
- Computer Engineering
- Information Technology
- or a related technical discipline
- Must be eligible and approved for a co?op work term through the academic institution.

Experience / Skills

- Foundational knowledge of at least one programming language (e.g., C#, Java, Angular/React, JavaScript, or similar).
- Basic understanding of software development concepts such as:
- Object-oriented programming
- Version control (e.g., Git)
- Databases and SQL fundamentals
- Exposure to artificial intelligence (AI) or machine learning concepts, such as:
- Using AI-assisted development tools (e.g., code completion, testing, or documentation tools)
- Working with APIs or services that incorporate AI capabilities
- Coursework, labs, or personal projects involving data analysis, automation, or intelligent systems
- Interest in learning how AI can be applied to improve software quality, productivity, and user experience.
- Exposure to web technologies, APIs, or frameworks is an asset.
- Strong analytical and problem-solving skills.
- Good written and verbal communication skills.
- Ability to learn new technologies quickly and adapt in a professional environment.
- Attention to detail and a strong interest in building high-quality software.

Citizenship Requirement N/A
