Job Description

Why Meridian?

At Meridian our aspiration is to integrate our purpose into everything we do for people, the planet, and communities. We believe that our greatest opportunity is to create opportunity and meet people where they are.

Factor us into your next career opportunity. We want you to grow with us and have an experience that's different. This is a place where you can expect the unexpected.

Find our story here: [About Meridian](#)

The role: 4 or 8-month Co-Op term

As a Quality Engineer Developer - Co-op, you will play a crucial role in designing, developing, and maintaining software solutions that support various teams and applications. You will work closely with cross-functional teams to deliver high-quality solutions that meet the needs of our clients and enhance our banking services.

Key Responsibilities:

- Design and develop evolving internal tools and software applications using C, C#, and the Microsoft technology stack that support application testing and releases.
- Design and develop a central tool that integrates different applications into a single dashboard view, providing live information to

users.

- Leverage and integrate AI and other tooling into current and new solutions.
- Collaborate with different teams within Solutions Delivery to gather requirements; ensure security standards and requirements are incorporated into all solutions.
- Write clean, efficient, and maintainable code following best practices and coding standards.
- Create and maintain documentation on solutions being built.
- Take part in code reviews and provide constructive feedback to team members.
- Stay up-to-date with the latest industry trends and technologies to ensure our solutions remain competitive and innovative. Create proof of concept projects to explore new systems and technology.

Team Participation:

- Actively participate in Quality Engineering team meetings.
- Provide solution options to reporting manager.
- Participate and collaborate with other teams within Solutions Delivery in building scripts and solutions.

Job Requirements

Qualifications:

- Software development experience with a focus on C#, Angular, and the Microsoft technology stack.
- Strong understanding of object-oriented programming principles and design patterns.
- Experience with database design and development, particularly with SQL Server.
- Familiarity with web development technologies such as ASP.NET, MVC, and Web API.
- Excellent problem-solving skills and attention to detail.
- Strong communication and collaboration skills.
- Ability to work independently and as part of a team in a fast-paced environment.

Additional Qualifications:

- Familiarity with DevOps practices and tools such as Azure DevOps and YAML Pipeline templates.
- Familiarity with AI pair programming practices using tools such as GitHub Copilot
- Knowledge of cloud computing platforms such as Azure.

Citizenship Requirement N/A
