Job Description	

A little bit about us

While Nestlé is known for KitKat, Gerber, Nescafe, and Häagen-Dazs, our recipe for success comes down to one thing: our people. We strive to lead a people-focused culture that empowers employees to bring their authentic selves to work each day. There are 3,500+ members of Nestlé Canada celebrated for taking action using agility, courage, and trust to find solutions that benefit the business or greater good. We're a team of Changemakers, who are curious and challenge the status quo, that take risks that will help drive us forward.

Our focus is not only on nourishing our customers, but also about enriching you. We know that empowerment leads to strong employee engagement, a great work culture, and motivated employees.

Position Summary?

We are looking for an Applications Web Developer Intern based at our North York Location for the months of May to August 2026. This role will be responsible to design, develop and maintain web applications using ASP.NET with C# as the main programming language. This position is an existing vacancy.

A day in the life of an Applications Web Developer Intern

As an Applications Web Developer Intern, you will be working on the maintenance and modernization of web applications, from design and architecture through to development and release.

You will also:

- Performance Monitoring & Analysis: Track, analyze, and generate reports on the performance of application models and digital systems while optimizing resource allocation and managing project budgets.
- Stakeholder Engagement: Collaborate with key internal and external stakeholders-such as supply chain teams, product development, packaging, and external vendors-to ensure the successful deployment of applications initiatives in line with company

objectives.

Job Requirements

What will make you successful?

As the successful candidate, your ability to connect business requirements and technology together will be essential and enhance user experience while supporting the organizations goals & objectives. Working in a semi-autonomous environment, your curiosity of new technologies and deep passion for coding will provide a platform for learning, risk management, engagement, and recognition of your contributions both independently and as part of a team.

You will also:

- Currently enrolled in a Computer Science or Engineering program or a related discipline.
- Full-stack web-based application technologies experience. ASP.NET, C# .NET, JavaScript, React. SQL Server (optional)
- Familiar with Cloud platforms with focus on Azure Cloud, DevOps, SSO
- Experienced in the Software Development Life Cycle (SDLC)
- A result and detail-oriented professional with strong analytical skills.
- Fast learner, and must be comfortable working within a dynamic, challenging environment.
- knowledge of Office365; SharePoint, Power Platforms.
- Adaptability and good judgement in their approach to different situations.
- Strong communication skills - verbal and written
- Familiarity with Agile methodology; scrum, Kanban

Citizenship Requirement N/A
