Country	Canada
Duration	4 or 8 months
Work Mode	To be confirmed
Salary Currency	CAD
Salary	Salary Not Available, 0 Major List
Job Description	
Job Requisition ID #	

26WD95960

Position Overview

As a Business Intelligence & Insights (BII) Intern, you'll join Autodesk's APM Business Intelligence and Insights team, which delivers analytics support and actionable insights across the business. This summer internship is based in Montreal. In this role, you'll help embed AI into day-to-day analytics by transforming recurring stakeholder questions into AI-powered, self-serve tools-making it easier to discover key metrics, interpret what they mean, and take informed action.

You will partner closely with analysts, marketers, product managers, and operations stakeholders across regions. Through interviews and rapid prototyping, you will design and build solutions using technologies such as Microsoft Copilot, ChatGPT and Power BI. You'll also explore how AI can unlock insights from unstructured customer feedback using AI, text analytics and sentiment analysis.

Responsibilities

- Stakeholder discovery: interview team members and stakeholders to understand roles, workflows, and pain points; translate findings into prioritized problem statements and success metrics.
- AI for analytics enablement: design and build AI-assisted experiences that help users self-serve answers (e.g., natural-language Q&A over web metrics, guided metric definitions, dashboard summarization and experimentation readouts).
- Tool building and integration: prototype and deliver usable tools (web apps, share-outs, Power BI reports, or chat-based interfaces) and document how to use them; iterate quickly based on feedback.
- Data grounding and evaluation: connect tools to trusted data sources (e.g., Snowflake, Adobe analytics platforms, Power BI

datasets); implement guardrails, logging, and lightweight evaluation.

- Text analytics exploration: mine Salesforce case and chat text fields for themes, sentiment, and emerging issues; create dashboards, central data repositories or recurring insight summaries for stakeholders.
- Communication: present demos and recommendations; create training materials that improve AI and data literacy for partners.

Job Requirements

Minimum Qualifications

- Currently pursuing a Bachelor's or Master's degree in analytics, computer science, engineering, statistics, math, business administration (including an MBA), or a related field.
- In your final year of studies, and available for a summer internship based in Montreal, QC.
- Professional proficiency in English and French.
- Working knowledge of SQL, Excel and Power BI and basic data analysis concepts (joins, aggregation, data models, trends).
- Interest in applying AI/LLMs to real business problems (e.g., Copilot, ChatGPT-style tools) and willingness to learn new technologies quickly.
- Strong communication skills and comfort collaborating with diverse, globally distributed partners.

Preferred Qualifications

- Intermediate to advanced SQL; experience with Microsoft tools such as Power Automate, Power Apps, and automation.
- Exposure to building small tools or apps (e.g., Power BI, or Teams/Slack bots).
- Familiarity with LLM concepts such as prompt design and evaluating model outputs.
- Experience with text analytics/NLP (sentiment analysis, topic modeling, or classification) and working with unstructured data.
- Ability to think outside the box.
- Comfort translating ambiguous stakeholder needs into clear requirements and an execution plan.

Citizenship Requirement N/A

APPLICATION INFORMATION

Application Procedure Through Employer Website

Special Application Instructions

Please click the "I intend to apply to this position" button on SCOPE and also submit your application via the employer's website.

Application Link: https://autodesk.wd1.myworkdayjobs.com/en-US/uni/job/Montreal-QC-CAN/Business-Intelligence-Intern_26WD95960-1?q=intern&locationCountry=a30a87ed25634629aa6c3958aa2b91ea
