About the job

Looking to launch your career at the cutting edge of healthcare? Join Sanofi for a chance to develop with mentoring and guidance from inspirational leaders while helping to make an impact on the lives of countless people worldwide. As Co-Op Student in our Digital M&S Data & Analytics, Corporate Functions, the role includes translating business strategy into digital, technology, AI and ways of working strategies, driving the business forward. Sanofi has recently embarked onto a vast and ambitious digital transformation program. The Digital Data team at Sanofi Canada is the innovation engine that enables the digital transformation of the company globally.

We are an innovative global healthcare company with one purpose: to chase the miracles of science to improve people's lives. We're also a company where you can flourish and grow your career, with countless opportunities to explore, make connections

with people, and stretch the limits of what you thought was possible. Ready to get started?

Main responsibilities:

If you are a curious problem-solver who thrives at the intersection of innovation, data, and technology, we want to meet you. We're looking for someone who loves to learn, asks the right questions, and can use creativity to solve business problems.

Core Responsibilities

- **Bridge the Gap:** You'll act as the vital link between our business goals and technical execution. You'll spend your time translating complex business requirements into clear, actionable technical needs for our development teams.
- **Solve the "Why":** Rather than just identifying symptoms, you'll conduct deep-dive analyses to find the root causes of business challenges. You will develop remediation plans that keep our products moving forward.
- **Collaborate Across the Business:** You'll partner daily with Product Owners, Data Engineers, and Data Scientists to scale existing platforms or build entirely new, novel solutions from the ground up.
- **Design for Scale:** You will help design solutions to business problems that are flexible and scalable, ensuring our tech stack can adapt to a fast-paced, global environment.
- **Tell a Story with Data:** Data is only as powerful as the action it inspires. You'll visualize complex datasets to tell a compelling story, influencing product roadmaps and helping stakeholders make high-impact decisions.
- **Champion New Initiatives:** From supporting the rollout of new features to creating clear documentation for end users, you will ensure our data tools are adopted and effective.
- *Why choose us?*
- Bring the miracles of science to life alongside a supportive, future-focused team.
- Discover endless opportunities to grow your talent and drive your career, whether it's through a promotion or lateral move, at home or internationally.
- Enjoy a thoughtful, well-crafted rewards package that recognizes your contribution and amplifies your impact.

This position is for a current vacant role that we are actively hiring for.

"Artificial Intelligence" refers to any systems that use automated processes, including algorithms and machine learning, to analyze data and make predictions, inferences, decisions, or recommendations without direct human involvement. These systems may process personal information to identify patterns, improve services, or support decision-making. The Company may use Artificial Intelligence for purposes including, but not limited to, resume screening and hiring, scheduling interviews or meetings, conducting surveys, matching skills with potential job openings, interview scoring, ensuring compliance with regulations applicable to our industry, and activities related to performance evaluation. Information collected and processed by the Company's Artificial Intelligence systems may include the personal information detailed above and calendar availability. It excludes the information collected and processed for monitoring purposes.

You should contact Human Resources if you have a question or concern regarding your personal information. You can also contact Canada's Privacy Officer via Sanofi's data subject request portal, Data Subject Rights Webform. The Data Subject Rights Webform can also be used to request access or correction of your personal information and file a complaint.

Sanofi is an equal opportunity employer committed to diversity and inclusion. Our goal is to attract, develop and retain highly talented employees from diverse backgrounds, allowing us to benefit from a wide variety of experiences and perspectives. We welcome and encourage applications from all qualified applicants. Accommodations for persons with disabilities required during the recruitment process are available upon request.

The salary range for this position is:
\$55,000 - \$65,000 (annual)

Final compensation will be determined based on demonstrated experience, skills, location, and other relevant factors. Employees may be eligible to participate in Company employee benefits programs, and additional benefits information can be found through the (CA) LINK OR (US) LINK.

Pursue Progress. Discover Extraordinary.

Progress doesn't happen without people - people from different backgrounds, in different locations, doing different roles, all united by one thing: a desire to make miracles happen. You can be one of those people. Chasing change, embracing new ideas and exploring all the opportunities we have to offer. Let's pursue progress. And let's discover extraordinary together.

At Sanofi, we provide equal opportunities to all regardless of race, color, ancestry, religion, sex, national origin, sexual orientation, age, citizenship, marital status, disability, or gender identity.

Watch our ALL IN video and check out our Diversity Equity and Inclusion actions at sanofi.com!

Job Requirements

About you

- Must be currently enrolled as a student at an accredited university, ***in an accredited Co-Op program*** and have completed at least one year of study.
- **Education:** Working towards a degree Bachelors or Masters in the fields of **Business, Computer Engineering, Computer Science, Life Sciences, Biotechnology, Entrepreneurship, Product Design, or Digital Innovation, or any related field**
- Minimum GPA of 3.0 on a 4.0 scale or 8.0 on a 12.0 scale
- **Technical skills:** Proficient in use of MS Office, including Excel, Outlook, PowerPoint, and Word
- **AI & GenAI Readiness:** Demonstrated interest or experience in artificial intelligence, including Generative AI (e.g., tools like ChatGPT, Snowflake Cortex, or design ideation tools). Willingness to experiment and incorporate AI into workflows.
- **Communication:** You can translate "tech-speak" into business needs, ensuring our products solve real-world problems.
- **Growth Mindset:** Open to learning new tools and adapting to emerging technologies in a fast-paced digital environment.
- **Work Authorization:** Must be **legally entitled to work for Sanofi in Canada** for the duration of the assignment.

Citizenship Requirement N/A
