Country Canada
Duration 8 months
Salary Currency CAD
Salary 43000.0 per year for 0 Major List
Job Description

Job Title: Co-op Data Analyst

Overview:

Tantalus is a technology company dedicated to helping utilities modernize their distribution grids by harnessing the power of data across all their devices and systems deployed throughout the entire distribution grid - from the substation to the EV charger located behind the meter. We offer smart grid solutions across multiple levels: intelligent connected devices, communications networks, data management, enterprise applications and analytics. Learn more at <http://www.tantalus.com/>.

The Opportunity:

As a Data Analyst Co-op, you'll work alongside a small, hands-on team maintaining and improving production analytics products that support smart grid operations for utility companies across North America. This is a role for someone who takes pride in clean, well-structured work and wants meaningful exposure to the full analytics development lifecycle.

What you will do:

- Work with the other members of your team to deliver new features and capabilities in TRUGrid Analytics products.
- Maintain and enhance our suite of Tableau dashboards and reports hosted on Tableau Server, including troubleshooting data source issues, optimizing workbook performance, and supporting end users.
- Work with the other team members to understand application/feature functionality and testability
- Python script cleanup and refactoring - improve code quality, adding documentation and writing unit tests to bring our codebase up to production standards.
- Research, track and understand new technologies
- Support data cleaning, preparation, and validation using PostgreSQL databases.

Job Requirements

What you Bring:

Education and Experience

- Student is enrolled in Data Analytics, Computer Science, Statistics or related disciplines.

- Has genuine curiosity about data systems and quality.
- Experience with Tableau Desktop and Tableau Server is a strong asset.
- Should be comfortable working with SQL, writing queries and have hands on experience with Python in writing maintainable code.
- Experience with command line tools in Linux
- Experience with Python, SQL, git and GitLab, and software development workflow tools is an asset

Personal Attributes Required:

- Strong organizational, time management, interpersonal and communication (both written and oral) skills.
- Ability to work efficiently, independently, and in a team environment.
- Willingness to learn
- Ability to think critically and effectively solve problems
- Strong technical aptitude, with a pragmatic, thoughtful approach to challenging problems

Nice to Have:

- Prior exposure to time series data, geospatial data (GIS software)
- Experience with git Go (Golang) or similar language such as Java or C++
- Experience with containerization concepts with Docker and Kubernetes
- Familiarity with HTML/CSS/Javascript
- Familiarity working with or developing REST API

Citizenship Requirement N/A
