Job Description

Job Title: Embedded Software Developer Co-Op

Job ID: R-27065

Join us in pioneering breakthroughs in healthcare. For everyone. Everywhere. Sustainably.

Our inspiring and caring environment forms a global community that celebrates diversity and individuality. We encourage you to step beyond your comfort zone, offering resources and flexibility to foster your professional and personal growth, all while valuing your unique contributions.

At Siemens Healthineers, we offer you a flexible and dynamic environment with opportunities to go beyond your comfort zone in order to grow personally and professionally. Sound interesting? Then come and join our global team as an Embedded Software Developer Co-op to contribute to the design, implementation, documentation and testing of our software.??

This is a role well suited for a highly motivated student looking to build their skill set and gain hands-on experience. As an Embedded Software Developer Co-op, your duties and responsibilities will be:

- Develops firmware in either multi-core systems or heterogeneous multi-processor systems, implementing digital signal processing algorithms, driver development
- Develops, documents and maintains firmware for the R&D and Reader production projects.
- Designs, develops, implements and documents application software for Epocal's internal tools.
- Uses applicable technologies that include: C#, .NET, WPF, Relational Database design and development (MS SQL Server), Unit

testing

- Windows applications development, including dynamic libraries, user interfaces, databases, services and forms
- Analyzes software application performance; devise and implement optimizations
- Develops software unit tests and perform manual quality-assurance testing
- Compiles technical documentation of software features and functionality
- Accountability for completion of assigned tasks

This position may suit you best if?you are familiar with the areas and concepts below, and would like to develop your skills within Healthineers:

- Software design, development, documentation and testing
- Working in a team?

The pay range for this position is \$20-\$32 hourly; however, base pay offered may vary depending on education, skills, and experience. Siemens Healthineers offers interns paid time off. This is a functional posting - apply here for consideration for ALL our Intern opportunities for this functional area across the company. We will follow up directly to discuss specific intern roles/projects if there is a fit your skills and qualifications.

Application/Response timing:

Applications are accepted on a rolling basis, starting in early Fall through approximately March, on an as-needed basis. Please note you may or may not hear back about opportunities immediately and will remain in consideration against opportunities as they arise unless otherwise contacted or you choose to withdraw your candidacy.

Who we are: We are a team of more than 72,000 highly dedicated Healthineers in more than 70 countries. As a leader in medical technology, we constantly push the boundaries to create better outcomes and experiences for patients, no matter where they live or what health issues they are facing. Our portfolio is crucial for clinical decision-making and treatment pathways.

How we work: When you join Siemens Healthineers, you become one in a global team of scientists, clinicians, developers, researchers, professionals, and skilled specialists, who believe in each individual's potential to contribute with diverse ideas. We are from different backgrounds, cultures, religions, political and/or sexual orientations, and work together, to fight the world's most threatening diseases and enable access to care, united by one purpose: to pioneer breakthroughs in healthcare. For everyone. Everywhere. Sustainably.
