Job Description	

Discover your full potential. At Tetra Tech, we are collaborating with industry-leading experts for a sustainable future for our world. We combine consulting and engineering with advanced analytics and technology to solve the world's most complex challenges. Our innovation hubs across the globe will enable you to share ideas and best practices while growing your professional network. Wherever you are in your career journey, you will benefit from working with world-class engineers, scientists, and technical specialists.

Apply today and join the company that is Leading with Science®.

At Tetra Tech we recognize that it is essential to actively and consistently recruit new talent who bring fresh perspectives and diverse skills to our team. Our reputation is built on our ability to find innovative solutions to complex quality-of-life issues around the globe. We pride ourselves on our forward-thinking, progressive-minded attitude. Our technical professionals strive for the highest level of excellence.

Tetra Tech FusionMap (<https://www.FusionMap.com>) is currently seeking to recruit up to 2 Co-Op students starting in May 2026. The work will be located at our downtown Vancouver office and will involve supporting the continuous development of SaaS platforms, integration of AI in B2B platforms, and Geospatial Analytics.

Role:

- Full-stack Software Developer Co-Op. Work term to be either 8 or 12 months.

Responsibilities:

- Develop new frontend and backend features, including comprehensive testing and documentation.
- Collaborate closely with developers to define test strategies and ensure testability of new and existing features.
- Develop and maintain automated test pipelines within CI/CD workflows to support continuous integration and deployment.
- Conduct regression, performance, and reliability testing to identify defects and improve system stability.
- Contribute to improving test coverage, test reporting, and quality metrics dashboards.
- Document test cases, automation strategies, and quality assurance processes.
- Support data processing workflows and ingestion into the web platform.
- Update and enhance the web application landing page to improve functionality and user experience.
- Design, implement, and integrate RESTful APIs.
- Manage and maintain cloud infrastructure and data services within the Azure environment.
- Contribute to Agile development processes in a fast-paced, collaborative team setting.
- Apply web security best practices to ensure secure development and data protection.
- Rapidly learn and adopt new technologies, tools, and methodologies.
- Communicate effectively with team members while adhering to established processes and standards.

Job Requirements**Qualifications:**

- Ability and willingness to work in an Agile, fast-paced development environment.
- Strong programming experience with TypeScript, Python, Node.js, React and Express
- Solid understanding of relational databases (RDBMS), particularly PostgreSQL.
- Experience with unit testing and end-to-end (E2E) testing methodologies.
- Knowledge of Docker and microservices architecture is an asset.
- Experience with Azure Cloud services and infrastructure is an asset.
- Familiarity with data processing and ingestion workflows is an asset.
- Experience with iOS application development is an asset.
- Strong sense of ownership with the ability to deliver results independently.
- Ability to learn quickly, think critically, and exercise sound judgment.
- Excellent problem-solving skills with strong attention to detail.
- Strong verbal and written communication skills to collaborate effectively, share knowledge, and provide constructive feedback.

Additional Information:

A requirement of working for Tetra Tech is that you are at least 18 years of age and legally entitled to work in Canada. (A copy of a valid work permit may be required.)

About Tetra Tech:

Tetra Tech combines the resources of a global, multibillion-dollar company with local, client-focused delivery in more than 550 locations around the world. Our reputation rests on the technical expertise and dedication of our employees-30,000 associates working together to provide smart, scalable solutions for challenging projects. We are proud to be home to leading technical experts in water, environment, infrastructure, resource management, energy, and international development.
