Job Location	Boisbriand, QC
Country	Canada
Duration	4 months
Work Mode	Fully Remote
	To be confirmed
Salary Currency	CAD
Salary	0.0 per hour for 0 Major List
Job Description	

As a C++ Software Development Intern, you will actively participate in the design, development, testing, and maintenance of the software suite integrated into our robotic product line, as well as the testing software used to verify these robots.

MAIN RESPONSIBILITIES

- Participate in all stages of development (software requirements gathering, design, implementation, testing) for applications and software components intended for our robotic products;
- Perform various tests (unit, system, functional) related to development;
- Develop internal software tools;
- Interact and collaborate with other development teams to ensure successful integration;
- Document and present completed work to the relevant stakeholders.

WHAT WE OFFER

- Remote work (according to job type);
- Competitive salaries;
- Group RRSP with employer contribution;
- Group insurance paid at 50% by Kinova;
- Up to 4 weeks of vacation;
- Personal days off in addition to vacation;

- Snacks, coffee, and fresh fruit at all times;
- A dedicated and great work team;
- A state-of-the-art environment;
- A company culture focused on the development of each individual;
- Free parking;
- Electric vehicle charging stations;
- Regular social and sporting events;
- And much more, but you'll have to meet us to learn more...

Kinova is committed to promoting a diverse and inclusive work environment for all and acting in discrimination against people on the basis of gender, nationality, minority status, or disability. As such, Kinova provides accommodation at all stages of the recruitment process and will treat all information relating to your health in a confidential and without prejudice. Please note that access to our interview rooms and our office spaces already meets universal accessibility standards. For more information about our Diversity and Inclusion Policy or for any interview accommodation requests, please contact emploi@kinova.ca.

JOB REQUIREMENTS

- Bachelor's degree in Software, Computer, Biomedical, Electrical, or Automated Manufacturing Engineering, or equivalent (3rd or 4th year);
- Relevant programming experience in C++ and Python;
- Experience with Git;
- Experience in a Linux development environment;
- Experience with Agile development practices and Continuous Integration (CI);
- Excellent interpersonal skills;
- Autonomy, resourcefulness, and a strong sense of initiative;
- Proficiency in English and French (oral and written).

ASSETS

- Experience in robotics;
- Experience with real-time systems;
- Experience with the EtherCAT protocol;
- Experience in C and embedded software development;
- Experience with modern C++ (11, 14, 17, 20);
- Experience with CMake, Jenkins, Conan, Artifactory;
- Experience with Docker and Docker-Compose;
- Experience with the Atlassian suite (Bitbucket, Jira, Confluence).

Citizenship Requirement N/A
