Job Description	

25WD92317, Intern, Software Developer

Position Overview

As a Software Developer intern on the Fusion 360 Team, you'll drive projects related to Configurations, that solves unique challenges that will directly help with user facing functionalities. You'll partner with software developers, user experience designers, and Quality Assurance developers on this industry-leading CAD Design Application used daily by millions of users to design, simulate, and manufacture products. As an intern, you will contribute to meaningful projects, be mentored by industry leaders, and participate in tech talks and other activities designed to support your personal and professional development. You will have the opportunity to work in related cloud backend services to help optimize user facing workflows.

Responsibilities

- Manage end-to-end projects, including designing, developing, and testing
- Partner with cross-functional teams to solve important problems across the Autodesk organization
- Maintain and enhance an existing codebase

About the Canada Intern Program

The 2026 Canada Internship program runs for 16 weeks (May 4th - August 21st, 2026). All internships are paid. As an intern, you will contribute to meaningful projects, be mentored by industry leaders, and participate in tech talks and other activities designed to support your personal and professional development. Our internships align with Autodesk's Flexible Workplace approach, which is designed to meet the needs of our business while providing flexibility in support of office, remote and hybrid work preferences.
