Job Description	

About:

Founded in 1998, thirdstream's platform provides leading identity verification and account opening for individuals and businesses, serving financial institutions from coast to coast. thirdstream's account opening ecosystem drives retail, commercial, and credit card onboarding. Our remote digital identity verification supports customizable online and in-branch consumer experiences.

Job Description:

We are seeking a motivated and talented full stack junior developer to join our team for an 8 month co-op placement. As a co-op student, you will work with the development team in supporting our platforms and customers, from helping to design, and maintain our applications. The ideal candidate should have experience in C#, .NET Core, and Azure.

Responsibilities

- Participates in the development of technology solutions, which utilizes our processes,
- templates, best practices and standards to maximize reliability, functionality, and integrity while minimizing costs and cycle time.
- Participates in problem determination and resolution.
- Aid in the development of architectural framework and design
- Helps to develop and maintain required documentation.
- Helps to develop unit tests, and integration tests.
- Participates in acceptance testing.
- Assists in transfer of business and technology knowledge.
- Works with the assigned team to help communicate with all areas to ensure a smooth efficient process.
- Reports status to PM on a regular basis.
- Consults with others to solve problems when required.

Other

- As we are a fully remote organization, we ask all employees to use their own computer and in exchange we will give a monthly allowance to help cover depreciation costs.

Salary range: \$26.00 - \$28.80/hr depending on experience

Job Requirements

Qualifications

- Ongoing post-secondary education in Computer Science or equivalent.
- Experience in (web)-application development with focus on with a focus on C# and .NET Core development.
- Previous experience with Angular a bonus!
- Some experience in relational database development utilizing Microsoft SQL Server
- Experience with additional technologies such as MVC, HTML, XML etc (preferred).
- Excellent English communication skills, attention to detail and organizational skills.
- Must be able to pass a police background check due to the nature of our industry.
