Job Description	

Who we are:

Canaccord Genuity (CG) is a leading independent full-service financial services firm, with operations in two principal segments of the securities industry: wealth management and capital markets. CG is driven by an unwavering commitment to build lasting client relationships - we achieve this by generating value for our individual, institutional, and corporate clients through comprehensive wealth management solutions and investment banking services. We are a leading independent wealth management firm in Canada, and the leading mid-market provider of investment banking advisory, equity research, sales and trading services for corporations and institutions.

We pride ourselves on understanding our clients' needs and finding innovative, bespoke solutions. Our entrepreneurial and friendly team will challenge you to learn and grow every day. We value great work and collaboration and strive to eliminate bureaucratic thinking. We're looking for talented people who thrive in a fast-paced environment and want to have an impact with innovative ideas and best practices.

Come be a part of our Canadian success story and help deliver superior experiences for our clients. At CG, we recognize that diversity across our business strengthens our client relationships and enables more innovative solutions. We strongly encourage applications from all qualified individuals regardless of race, religion, colour, national origin, gender, sexual orientation, age, marital status, or disability status. CG provides an accessible candidate experience. If you need any accommodations throughout the

interview process and beyond, please let us know.

Our Canadian operation, Canaccord Genuity Corp., is seeking a curious hands-on Jr Software Developer with preferred experience in .Net (C#), Python, Azure, Azure Devops, and SQL to join our Application and Integrations team in the Wealth Management Group. The ideal candidate would be pursuing a degree in computer science or related field. You communicate clearly, learn quickly, and take ownership of small end-to-end tasks with guidance.

This is a hybrid role with alternating days in the office. Hours for this role range from 7:00 am - 3:00 pm, and 8:00 am - 4:00 pm.

Job Requirements & Qualifications

Responsibilities:

- Build AI-based automations and platforms to streamline workflows across finance, risk, compliance, and operations.
- Accelerate internal automation projects (e.g., contract approval workflows, payroll exception handling, invoice allocations).
- Prototype, evaluate, and test AI tools (e.g., Claude Code) and help integrate them into developer workflows.
- Stay current on and recommend improvements in cloud tooling, AI/automation platforms, developer productivity, code scanning/security tooling.
- Develop and maintain backend services and APIs.
- Contribute to front-end features in Angular, integrating with backend APIs and authentication.
- Support, debug, and modernize legacy applications; participate in migrations to the latest .NET/Angular and Azure services.
- Write clean, maintainable code with unit/integration tests; participate in code reviews and use Git-based workflows.
- Build and maintain CI/CD pipelines; respond to code scanning results and adopt secure coding practices.
- Work with Azure services for hosting, storage, identity, and monitoring.
- Collaborate with product, operations, and compliance partners; break down requirements, document simple designs, and deliver increments in an agile process

Job Requirements

Key Qualifications:

- Pursuing a degree in Computer Science, Software Engineering, or related field; or equivalent experience.
- 0-2 years of hands-on programming experience in either:
 - C#/ .NET (ASP.NET Core, basic Web APIs), or
 - Python (FastAPI/Flask, basic scripting/automation).
- Familiarity with:
 - Core CS concepts (OOP, data structures, algorithms).
 - REST/HTTP, JSON, serialization.
 - Git, branching, pull requests, code reviews.
 - Writing and running unit tests (xUnit or pytest).
 - Basic SQL (SELECTs, joins) and data access patterns (EF Core or SQLAlchemy).
 - Comfort reading existing code, debugging, adding logs/metrics, and writing clear documentation.
 - Strong communication skills and a willingness to learn quickly in a fast-paced environment.

Preferred Qualifications:

- Angular (TypeScript): components, services, routing, forms, basic RxJS.
- Azure cloud: Functions, App Service, Storage (Queues/Blobs/Tables), Key Vault, Application Insights, Azure DevOps or GitHub Actions.
- AI/automation: familiarity with LLMs and developer AI tools (e.g., Claude, OpenAI), prompt design, data pipelines, SDK/API integration.
- Secure coding and compliance awareness (static analysis, code scanning, secrets management, auth flows like OAuth/OpenID Connect).
- Messaging/async processing patterns (queues, pub/sub) and event-driven design.
- Exposure to financial systems or back-office operations.
- Secure coding and compliance awareness (static analysis, code scanning, secrets management, auth flows like OAuth/OpenID Connect).
- Messaging/async processing patterns (queues, pub/sub) and event-driven design.
- Exposure to financial systems or back-office operations.

Citizenship Requirement
