12-16 Week internship spring/summer 2026

Haven Studios is a game development studio headquartered in Montreal. In May 2021, we embarked on a journey to start Haven as a small team with big ambitions. Our goal was to build a studio of exceptional people where together we could make the kind of games we've always wanted to create - games we've longed to play. At Haven, we believe that kindness, adaptability and fearless optimism make space for creative excellence. We are a hybrid studio that supports flexibility, focus and collaboration for our teams.

Haven joined the PlayStation Studios family as the first Sony game development team in Canada in 2022.

We have made amazing progress in a short time thanks to our talented, passionate team and their excellent contributions. Our first game, Fairgames, is in development for PlayStation and PC. Fairgames is a competitive multiplayer action heist with a vision to build a systemic and evolving world focused on freedom, thrill and playfulness that will entertain and engage players for years to come.

Position - Pipeline Programmer Intern

We are looking for a Pipeline Programmer Intern to join our Pipeline Team dedicated to developer efficiencies and Production Key-Performance Indicators. This role is ideal for those interested in data organization and dashboard creation. You will be responsible for gathering Key Performance Indicators (KPIs) from across the company and compiling them into an easy-to-navigate dashboard.

Reporting

The Pipeline Programmer Intern will report to a Pipeline Architect.

Responsibilities and Duties

- Participate in code reviews, write documentation and implement unit tests.
- Build data pipelines to pull together data from multiple sources
- Create specific dashboards to visualize KPI for stakeholders

Job Requirements

Minimum Qualifications

- Strong programming skills
- Familiarity with Rest API
- Familiarity with databases
- Ability to debug and troubleshoot issues with debugging tools and techniques.

Preferred Qualifications

- Familiarity with Rust
- Familiarity with Dashboarding applications
- Familiarity with Data analytics
- Familiarity with cloud (AWS, GCP, Azure)

Citizenship Requirement N/A

APPLICATION INFORMATION

Application Procedure Through Employer Website

Special Application Instructions

Please click the "I intend to apply to this position" button on SCOPE and also submit your application via the employer's website.
