Work Mode Fully Remote
Salary Currency CAD
Salary 4000.0 per month for 40 Major List
Job Description

Who are we?

Sahova is disrupting the construction industry by reimagining how builders, contractors, and trades work together. We're building the platform that modernizes project management, scheduling, and communication for the construction world - an industry that has been underserved by technology for too long. We're early, we're moving fast, and the work you do here will be seen and felt by real users from day one.

What does this team do?

We're a small, scrappy team building something big. Every engineer here owns meaningful pieces of the product - there's no busywork, no being lost in a giant org. You'll work directly with the founder and have real input on product decisions. We're laying the foundation of a platform that will change how construction gets done.

What will you do?

As a Co-op Software Developer at Sahova, you'll work across the full mobile stack - building and shipping features that real builders use daily. You'll be involved in everything from architecture decisions to implementation to seeing your work go live. This is a high-ownership role with real responsibility.

Job Requirements

Basic Qualifications

- Currently enrolled in 2nd year or above in a Computer Science or related degree program- Experience with React or modern JavaScript frameworks
- Familiarity with mobile development and Capacitor or similar
- Strong fundamentals in problem solving and software design
- Experience working with backend services or databases (Supabase, SQL, PostgreSQL, etc.)

- Self-starter who takes ownership and gets things done
- You're entrepreneurial, hungry, and treat the work like it's your own - this isn't a passive co-op, it's a chance to build something real from the ground up

Citizenship Requirement

Canadian Citizens Preferred
