Job Location	Vancouver, BC
Country	Canada
Duration	4 or 8 months
Salary Currency	CAD
Salary	50000.0 per year for 0 Major List
Salary Range \$	\$50K - \$75K
Job Description	

Critical Systems Labs Inc. (CSL) is a small but mighty engineering consultancy focused on software-intensive, safety-critical systems (e.g. aerospace, automotive, energy, defense, marine navigation, medical technologies and rail signaling). We are a bright, collaborative team, internationally recognized for our expertise in the management of safety risk and security vulnerabilities. Much of our work is based on emergent technologies, including AI enabled systems.

As a **Software Developer Co-op student** with CSL, you will contribute to the development of advanced software tools used to support the analysis of safety critical systems. You will drive new features from concept and design through to implementation and testing and work with our engineers to understand the function of the tools, the goals of end users, and the tasks and environments in which the tools will be used. This role is suited to strong 3rd and 4th year students who are eager to take initiative, learn quickly, and make the most of a high-opportunity, high-ownership environment.

What CSL offers

- CSL provides an inspiring, positive and collaborative work environment with fascinating projects.
- We are flexible in our work options, including remote work. We also have an accessible office located in Waterfront Station, the central transit hub in downtown Vancouver. On-site fitness facility and secured indoor bike parking are available.

Job Requirements

Required Skills and Qualifications

- 3rd or 4th year students in Computer Science, Software Engineering, or similar
- Some professional software development experience (through co-op placements or summer jobs)

- Knowledge of object-oriented design principles
- Experience with Java and TypeScript and/or JavaScript with bonus points for Spring and Angular
- Experience with relational databases (e.g. MySQL)
- Experience with Git version control
- Experience writing test code (e.g., unit testing, integration testing)
- Must reside in Canada and be legally able to work in Canada. (We are unable to offer sponsorship.)

Additional skills

- Excellent communication skills, both written and verbal
- Ability to work effectively in a collaborative team environment
- Strong critical thinking and problem-solving skills
- Self-motivated and comfortable working with a high degree of autonomy
- Able to make progress on open-ended tasks with guidance rather than step-by-step instructions
- Demonstrates a proactive, ownership-driven approach to work, seeking clarity, feedback, and learning opportunities
- Strong interest in learning new engineering processes and principles
- Ability to produce high quality technical documents and reports

Citizenship Requirement N/A

Special Application Instructions

Think you would be perfect for this position? If you would like to be part of our clever and creative team, solving challenging problems, we look forward to hearing from you. **Please send an email cover letter with your resume to hire@csllabs.com with "*Application - Software Developer Co-op*" in the subject line.** We greatly appreciate the interest of everyone who applies for this position, and we will review all applications. Only candidates selected for interview will be contacted.

Please click the "I intend to apply to this position" button on SCOPE and also submit your application via the employer's website. Applications are accepted on a rolling basis and the posting may be expired at any time by the employer as submissions are received. Students should submit their applications as soon as they are ready.
