AI Disclosure: No automated screening tools will be used during the application process

What you will do

- Full-stack development of new functionality in existing products.
- Full-stack maintenance development of existing products.
- Work with team leads and product managers to plan and assign work items.
- Work with the technical support team when troubleshooting issues on released software.
- Gather data and analyze the business challenges alongside subject matter experts.
- Attend weekly lunch and learn sessions where you will get to learn more about a business topic of the week! Some examples of past topics include: Top 10 Presentation Skills, Environmental Health and Safety, StrengthsFinder, etc.
- Deep dive into data and use evidence-based decision making that helps design a new process, introduce new technology, re-imagines the way we collaborate, or positively influences our culture.
- Sit in on meetings both within and beyond your designated role to broaden your engagement.
- Attend daily scrum meetings with your team to discuss what you did, what you plan to do, and any blockers you may have to complete assigned tasks
