

Job Posting: 178591 - Position: S26 Software Engineering Co-op Students (2 Positions Available) 178591B

Co-op Work Term Posted:	2026 - Summer
App Deadline	03/01/2026 11:59 PM
Application Method:	Through UBC Science Co-op
Posting Goes Live:	02/24/2026 08:41 AM
Job Posting Status:	Approved

ORGANIZATION INFORMATION

Organization	Sharp Ideas in Mining (SIIM)
City	Vancouver
Province / State	BC
Country	Canada

JOB POSTING INFORMATION

Placement Term	2026 - Summer
 Job Title 	S26 Software Engineering Co-op Students (2 Positions Available) 178591B
Position Type	Co-op Position
Job Location	Vancouver, BC
Country	Canada
Duration	4 months
Work Mode	In-Person
Salary Currency	CAD
Salary	25.0 per hour for 0 Major List
Job Description	

ABOUT US

Sharp Ideas in Mining (SIIM) is a small mining consultancy firm supplying technical support to the mining industry.

THE OPPORTUNITY

We are hiring **two (2)** Co-op students to join our Vancouver team. You will work directly with the founders, gaining exposure to mining terminology, complex problem spaces, and production-grade software development.

While you will collaborate as a team, we are looking for two distinct skill sets:

Role A: AI & Data Science Engineering Student

Focus: Cost modeling, Python workflows, and Data Analysis.

- **Core Task:** Design, implement, and refine mining cost models that feed into our core computational engine.
- **Data Ops:** Extract, clean, and analyze complex mining datasets using Python, PostgreSQL, Excel, and AI LLM Querying.
- **Workflow:** Turn experimental analyses into repeatable, documented workflows, and become deeply knowledgeable about the underlying mining data.
- **Math:** Apply advanced statistics to reason about complex datasets.

Role B: Full Stack Engineering Student

Focus: Refactoring, System Architecture, and GUI Development.

- **Legacy Refactoring:** Refactor our legacy expert-system Kernel from Fortran to Rust, improving modularity, testability, and

performance.

- Interface Development:** Design, develop, and enhance in-house GUI programs using Tauri (Rust + Web Frontend).
- System Architecture:** Contribute to the design of a scalable software ecosystem that ensures long-term extensibility.

Shared Responsibilities

Both students will contribute to general engineering and operational tasks:

- Security & Ops:** Maintain and refine the system's security posture and development workflows.
- Web Presence:** Update the SIIM corporate website to better display capabilities for client outreach.
- Learning:** Rapidly acquire knowledge of mining terminology, the problem space we are in, and the specific software stack we run.

LOGISTICS

- Start Date:** Monday, April 27, 2026
- End Date:** Friday, August 28, 2026
- Hourly Wage:** \$25
- Application Deadline:** March 1st, 2026

To Apply: Please submit your resume, unofficial transcript, and a cover letter.

Job Requirements

QUALIFICATIONS

- Eligibility:** Must be currently enrolled in a recognized Co-op program at a Canadian post-secondary institution and available for full-time, on-site work in Vancouver.

Required Skills (Both Roles):

- Languages:** Proficiency in **Python** is required.
- Communication:** Excellent English communication skills (written and verbal).
- Mindset:** A self-starter who works efficiently independently but is a team player; who can pivot and adapt to failure but be unafraid to experiment.

Role-Specific Skills:

•For AI & Data Science:

- Proven experience in Data Analysis and Excel.
- Strong grasp of calculus, statistics, and data modeling.
- Understanding of AI fundamentals, including LLMs and agentic workflows.

•For Full Stack:

- Experience with **Rust** and **React** is highly preferred.
- Strong understanding of software architecture, design patterns, and code maintainability.
- Experience working with legacy codebases is a bonus.

Citizenship Requirement N/A

APPLICATION INFORMATION

Application Procedure	Through UBC Science Co-op
Cover Letter Required?	Yes
Address Cover Letter to	Hiring Manager

Special Application Instructions

To Apply: Please submit your resume, unofficial transcript, and a cover letter.
