About This Opportunity

We are currently hiring a Systems Design Intern for a summer term position, from **May 2026 - December 2026 (8months)** at our Hitachi Rail office

Key Accountabilities

TECHNICAL:

- The specific work assignment will be based on the project needs. General duties include but not limited to the following:
- Develop, implement & maintain tools and scripts (Microsoft VB, DOORS dxl, etc.), to assist Systems engineers in day-to-day activities
- Perform technical/engineering analysis as required for Systems Design
- Assist other members of assigned project team in miscellaneous requirement specification and management activities, e.g.: Importing contract requirements and other documents into IBM Rational DOORS; Tracing customer contract requirements to system level and/or lower level requirements; Preparing documentation for configuration management and customer delivery purposes following established processes; Creating or modifying existing train control system & subsystem requirement specifications, interface requirements & systems design descriptions by analyzing, decomposing, modelling & refining customer requirements
- Importing contract requirements and other documents into IBM Rational DOORS
- Trace customer contract requirements to system level and/or lower-level requirements.
- Accurately reports work progress and estimates to complete the assigned work.

SAFETY:

- Promotes a safety culture where product safety is paramount.

Job Requirements

Key Requirements

- The successful candidate should be working towards a bachelor's or master's degree from an accredited university or college in Systems, Electrical/Computer Engineering, or Computer Science, Mechatronics, or a related field.
- Completion of the second or third year of your undergraduate degree, or currently pursuing a master's degree
- Good technical writing skills, excellent communication, and analytical skills; excellent command of the English language, both written and oral
- Familiarity with project work environment
- MS Office & Basic software and/or scripting knowledge
- The ability to work 40 hours a week in a hybrid environment for the duration of the internship is essential. **At least 2 days a week in the office.**

Preferred Qualifications

- Co-op student available for an 8 month term, with at least one additional quarter or semester of coursework remaining after the completion of the internship.
- Previous coop/internship work experience in system design or rail industry is an asset.
- Relevant school projects may be considered.
- Rail signaling, CBTC (Communication Based Train Control), and knowledge of specification-driven systems design (as it applies to computer systems with both hardware & software operation)

Citizenship Requirement N/A
