Job Title: TIGRESS Student Research Assistant -- AI/ML focus (On-site)

Job ID: JR102045

Application Deadline: **March 22, 2026**

Discover TRIUMF, Canada's particle accelerator centre, and one of the world's leading laboratories for particle and nuclear physics and accelerator-based science. TRIUMF's diverse community of nearly 600 multidisciplinary researchers, engineers, technicians, tradespeople, staff, and students create a unique incubator for Canadian excellence, as well as a portal to premier global collaborations. Fueling innovation and improving lives, we are committed to accelerating discovery and shaping a better world. Equity, diversity, and inclusion are integral to excellence and enhance our ability to create knowledge and opportunity for all. Together, we are committed to building an inclusive culture that encourages, supports, and celebrates the voices of our employees, students, partners, and the people and communities we serve.

TRIUMF's student program typically hires ~40 students each term from across all disciplines who hang together socially and professionally during the term, and beyond. Our program offers young minds a chance to gather, learn, make new friends, and have fun doing so during their time at TRIUMF. We hold weekly ProD sessions for students which include different activities such as conflict resolution, emotional intelligence, critical thinking, and active listening. Additionally, we hold weekly seminars about the different experiments at TRIUMF, and these talks specifically cater to students. Located on the UBC campus makes it easier for

students to make friends, create memories, and explore Vancouver all while working at TRIUMF.

TRIUMF's student program is more than just a place to work, its learning, memories, friendships, exploration, and development all clubbed into one.

Come join us to see how we are working to unlock the mysteries of the universe and shape the future. Apply now and be part of our extraordinary journey.

Learn more about the amazing research and work we do at TRIUMF.

BASIC FUNCTION:

The general duty of the candidate shall be to support the Gamma-Ray Spectroscopy at ISAC (GRSI) program at TRIUMF. including but not limited to application of Machine Learning techniques to a specific data set and upgrading Linux-based data acquisition and analysis nodes associated with TIGRESS.

RESPONSIBILITIES:

The specific goal for the candidate for this work term shall be to apply Machine Learning techniques to the analysis of data from a specific data set used to identify the isotopic components of ISAC-II accelerated beams. Depending on the time needed to accomplish this goal, additional tasks will include upgrading and maintaining Linux-based computing nodes used for GRSI experiments, and participating in the ongoing maintenance, troubleshooting, and repair of GRSI-related gamma-ray and charged-particle detectors, especially those used with TIGRESS.

LEARNING OUTCOMES:

Fundamentals of nuclear science; radiation measurement; data analysis; signal transmission and processing; vacuum and gas-handling systems

TRIUMF, Canada's national laboratory for particle and nuclear physics, is situated on the vibrant south campus of the University of British Columbia, nestled within the beautiful Pacific Spirit Park in Vancouver, BC.

At TRIUMF, we value our employees and are committed to providing a competitive total rewards package. In addition to a competitive salary, we offer comprehensive benefits that promote the well-being and security of our staff. Our organization provides an excellent opportunity to grow your career in a high-profile national research facility, where you can make a difference.

If you are passionate about science, engineering and technology, driven to excel, and eager to be part of a collaborative and forward-thinking organization, we encourage you to apply. Take the next step in your career journey with TRIUMF.

TRIUMF offers help with travel costs for students outside the Vancouver and surrounding area.

Job Requirements

QUALIFICATIONS:

The successful candidate shall have a minimum 4 terms of physics, engineering physics, mathematical physics, computer science or computer engineering, or comparable experience. Experience with applying machine learning to practical problems, either through coursework, laboratory work, or personal development interests, is a mandatory . Experience in using and managing Linux systems is a highly valuable asset. The successful candidate shall have taken a 2nd year physics laboratory class, or discipline-specific equivalent. Other skill and experience relevant to the general tasks associated with this position include: report writing, electronic assembly (soldering, antistatic practices, clean rooms); other fine assembly jobs; use of oscilloscopes, cryogenics, vacuum systems or turbine systems; light industrial, manufacturing or construction work; web page design with forms, PHP, javascript etc.

Skills required:

Artificial Intelligence (AI), C (Programming Language), C++ Programming Language, Circuit Theory, Electronic Assemblies, Liquid Nitrogen Containers, Manufacturing, Ubuntu Linux Administration, Vacuum Chambers, Web Page Development

Citizenship Requirement

N/A
